Mechanical Handling and Works Equipment, 1923 The Electrical Review, 1886 *Artificial Intelligent Techniques for Electric and Hybrid Electric Vehicles* Chitra A., Sanjeevikumar Padmanaban, Jens Bo Holm-Nielsen, S. Himavathi, 2020-07-10 Electric vehicles are changing transportation dramatically and this unique book merges the many disciplines that contribute research to make EV possible so the reader is informed about all the underlying science and technologies driving the change An emission free mobility system is the only way to save the world from the greenhouse effect and other ecological issues This belief has led to a tremendous growth in the demand for electric vehicles EV and hybrid electric vehicles HEV which are predicted to have a promising future based on the goals fixed by the European Commission's Horizon 2020 program This book brings together the research that has been carried out in the EV HEV sector and the leading role of advanced optimization techniques with artificial intelligence AI This is achieved by compiling the findings of various studies in the electrical electronics computer and mechanical domains for the EV HEV system In addition to acting as a hub for information on these research findings the book also addresses the challenges in the EV HEV sector and provides proven solutions that involve the most promising AI techniques Since the commercialization of EVs HEVs still remains a challenge in industries in terms of performance and cost these are the two tradeoffs which need to be researched in order to arrive at an optimal solution Therefore this book focuses on the convergence of various technologies involved in EVs HEVs Since all countries will gradually shift from conventional internal combustion IC engine based vehicles to EVs

HEVs in the near future it also serves as a useful reliable resource for multidisciplinary researchers and industry teams
