

TC Effects Inside

We've built two of the newest and most innovative TC effects into the Konnekt 24D - Fabrik C channel strip and Fabrik R reverb, both known from the PowerCore platform. Once you're connected you have instant access to superior reverbs and dynamics processing. The effects can be used in stand-alone mode and offer unique direct monitoring capabilities, even between devices. Both Fabrik C and Fabrik R are based on MINT™ - Meta Intuitive Navigation Technology - a completely new approach to working with audio. The MINT™ technology allows you to execute complex audio adjustments simply by moving icons around the screen.

Ultimate Signal Path

The 24-bit/192 kHz audio interfaces are based on TC's years of research into analog design and converter technology, as well as the experience from other landmark products like the Finalizer and the flagship System 6000. The internal architecture ensures optimal performance and quality, and gives you the highest possible sound quality from the inputs, through to the built-in real-time DSP, and on to the recording application.

Assimilator Konnekt

Konnekt 24D also includes Assimilator Konnekt which is an extremely powerful equalization tool that "learns" the frequency curve of one piece of audio so it can be applied to another audio file - Ideal for analyzing and copying EQ curves of individual instruments, voices or reference mixes. It truly shines when applied to align the frequency response of different tracks recorded at different times compiled to appear on the same album.
