Power Ambition Glory Steve Forbes, John Prevas, 2010-06-01 Based on an extraordinary collaboration between Steve Forbes chairman CEO and editor in chief of Forbes Media and classics professor John Prevas Power Ambition Glory provides intriguing comparisons between six great leaders of the ancient world and contemporary business leaders Great leaders not only have vision but know how to build structures to effect it Cyrus the Great did so in creating an empire based on tolerance and inclusion an approach highly unusual for his or any age Jack Welch and John Chambers built their business empires using a similar approach and like Cyrus they remain the exceptions rather than the rule Great leaders know how to build consensus and motivate by doing what is right rather than what is in their self interest Xenophon put personal gain aside to lead his fellow Greeks out of a perilous situation in Persia something very similar to what Lou Gerstner and Anne Mulcahy did in rescuing IBM and Xerox Character matters in leadership Alexander the Great had exceptional leadership skills that enabled him to conquer the eastern half of the ancient world but he was ultimately destroyed by his inability to manage his phenomenal success The corporate world is full of similar examples such as the now incarcerated Dennis Kozlowski who flush with success at the head of his empire was driven down the highway of self destruction by an out of control ego A great leader is one who challenges the conventional wisdom of the day and is able to think out of the box to pull off amazing feats Hannibal did something no one in the ancient world thought possible he crossed the Alps in winter to challenge Rome for control of the ancient world That same innovative way of thinking enabled Serge Brin and Larry Page of Google to challenge and best two formidable competitors Microsoft and Yahoo A leader must have ambition to succeed and Julius Caesar had plenty of it He set Rome on the path to empire but his success made him believe he was a living god and blinded him to the dangers that eventually did him in The parallels with corporate leaders and Wall Street master of the universe types are numerous but none more salient than Hank Greenberg who built the AIG insurance empire only to be struck down at the height of his success by the corporate daggers of his directors And finally leadership is about keeping a sane and modest perspective in the face of success and remaining focused on the fundamentals the nuts and bolts of making an organization work day in and day out Augustus saved Rome from dissolution after the assassination of Julius Caesar and ruled it for more than forty years bringing the empire to the height of its power What made him successful were personal humility attention to the mundane details of building and maintaining an infrastructure and the understanding of limits Augustus set Rome on a course of prosperity and stability that lasted for centuries just as Alfred Sloan using many of the same approaches built GM into the leviathan that until recently dominated the automotive business **Arts & Humanities Citation Index** ,1998

Perhaps the most important legacy of the ancient Greeks is their invention of the form of government we hold most dear. Democracy. Ancient Greece's various cities and their forms of government and the birth of government by the people are presented in simple straightforward language. An excellent resource on both ancient Greece and the concept of democracy.

American Book Publishing Record, 1991 Politics and Government in Ancient Greece Melanie Ann Apel, 2004
Ancient Greece is known as the birthplace of democracy. In this book students will learn how Greece's government evolved from monarchy to oligarchy to tyranny and finally to democracy. Key players in this development are highlighted and the structure of Greek government is explained. The Greek jury system and the use of a lottery to select government officials from the population of male citizens are all explained. *Democracy, Justice, and Equality in Ancient Greece* Georgios Anagnostopoulos, Gerasimos Santas, 2018-11-16
The original essays in this volume discuss ideas relating to democracy, political justice, equality and inequalities in the distribution of resources and public goods. These issues were as vigorously debated at the height of ancient Greek democracy as they are in many democratic societies today. Contributing authors address these issues and debates about them from both philosophical and historical perspectives. Readers will discover research on the role of Athenian democracy in moderating economic inequality and reducing poverty, on ancient debates about how to respond to inborn and social inequalities and on Plato's and Aristotle's critiques of Greek participatory democracies. Early chapters examine Plato's views on equality, justice and the distribution of political and non-political goods, including his defense of the abolition of private property for the ruling classes and of the equality of women in his ideal constitution and polis. Other papers discuss views of Socrates or Aristotle that are particularly relevant to contemporary political and economic disputes about punishment, freedom, slavery, the status of women and public education, to name a few. This thorough consideration of the ancient Greeks' work on democracy, justice and equality will appeal to scholars and researchers of the history of philosophy, Greek history, classics as well as those with an interest in political philosophy.
