Japan teacher ownership teacher professionalism student learning focused dialogue teacher collaboration and teacher professional community has attracted educators and researchers worldwide However Lesson Study does not have the same meaning as its original Japanese expression Jugyou Kenkyuu a combination of two Japanese words Jugyou meaning instruction or lesson s and Kenkyuu meaning study or research To bridge the gap between Jugyou Kenkyuu and Lesson Study and therefore maximize the potential of Lesson Study in the world this edited volume provides two mirrors for those who wish to reflect on and implement Lesson Study within their own contexts One section discusses how Lesson Study is utilized in Japanese teacher education and how this system reproduces the very culture of Lesson Study The other section addresses case studies showcasing Lesson Study implementation in several countries such as the United States Germany Norway Peru and Uganda and discusses the opportunities and challenges that arise when Lesson Study based teacher education expands beyond Japan to the rest of the world This book will appeal to anyone interested in learning about Lesson Study Second Handbook of Research on Mathematics Teaching and Learning Frank K. Lester, 2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research findings might be for those outside their immediate community
