### ABSTRACT

**Aims:** A school in which professional learning occurs among teachers is beneficial to both teachers and students. Professional learning is something teachers do, as they learn and share information and materials, and strive to improve student learning outcomes. Teachers are engaged in collaborative learning process through PL in order to develop their teaching skills and knowledge. Teacher collaboration has been acknowledged as critical in the teacher learning literature, but PL has been studied in a small number of research articles.

**Research Design:** This paper explores how teachers' PL of planned or unplanned events is viewed and experienced within school.

## **Teachers Perspectives On Continuing Professional Development:**

**Teachers' Perspectives on Continuing Professional Development** Matseliso Mokhele, 2014-11-12 There is a consensus that many continuing professional development programmes have yet to understand professional development from the teachers' perspectives. This perspective acknowledges what drives teachers to enlist in these programmes and how such programmes can make a difference to them and their classrooms. In this book, I explore the teachers' opinions of the continuing professional development intervention, its meaning to them and their work, and its impact on their classroom practices and students for the duration of the intervention and beyond. In conclusion, I propose that continuing professional development, however well intentioned and executed, is received differently by each teacher as a result of their personal circumstances and investment in the programme. I argue that the greater the unity between the personal circumstances and motivations of the teachers and those of the continuing professional development intervention, the more likely the outcome will be meaningful for the participating teachers. In turn, the ability to sustain the benefits of the intervention will be enhanced.

*Continuing Professional Teacher Development in Sub-Saharan Africa* Yusuf Sayed, 2018-03-22 Continuing Professional Teacher Development in Sub-Saharan Africa explores the prospects that the on-going continuous professional development (CPD) of teachers working in schools offers for meaningful change, particularly towards improving the quality of educational provision for the majority of the continent's children. By reflecting on teacher professional development efforts and their place in broader education reforms, the book highlights the challenges of teacher CPD in these education contexts, strongly shaped by endemic poverty, underdevelopment, and social upheaval. The collection draws together examples of innovation and resilience and the valuing of teachers as critical role players enabled and empowered through their on-going development as education professionals. Drawing together a wealth of experience, the volume identifies the policy and research implications for the future of CPD across the continent, providing important lessons that can be integrated into a post-2015 development agenda for Africa.

*The Personalized Continuing Professional Learning of Teachers* Orit Avidov-Ungar, 2023-11-23 Taking a personalized and global approach, this timely volume links theory with application in the context of continuing professional development (CPD) for teachers, exploring current scholarship on teachers' CPD and charting the shift towards continuing professional learning (CPL). **Collaboration as a Tool for Professional Development. The Perspectives of Secondary School Mathematics Teachers in Zambia** Maureen Sinyangwe, Yota Dimitriadi, 2021-09-14 Academic Paper from the year 2021 in the subject Pedagogy. The Teacher Educational Leadership grade 1.00 University of Reading. Institute of Education. Language: English. Abstract: This paper explores the reasons for the teachers' reluctance to engage in collaborative tasks and also the implications this has for collaboration as a tool for professional development. There is increased attention on Continuing Professional Development of teachers for the purpose of improving the quality of teachers' practices and improving pupils' learning experiences and achievement and overall quality of education. One important aspect of teachers' CPD that is championed is collaboration. CPD through collaboration can be considered as an intensive interaction that engages educators in opening up their beliefs and practices to investigation and debate. Collaborative CPD can cover a number of activities ranging from working together with colleagues in informal unplanned ways to structured more formalized communities of inquiry or learning communities. Among the potential benefits of Collaborative CPD are sharing knowledge, understanding and experiences and enhancing reflective practices to support professional development. One point is clear that teachers' willingness to actively engage in or to collaborate for the purpose

of their professional development is crucial for collaborative CPD. While there are several benefits that come with collaborative CPD, some teachers in the Zambian context are reluctant to collaborate. Why would teachers be reluctant to collaborate?

**Teachers' Perspectives on Finnish School Education** Eduardo Anderjaska, 2013-12-11. This superbly researched study offers a chalk face perspective on the secret of Finland's educational success. Providing an intimate and revealing portrait of the Nordic nation's schools and its teacher training system, it sets out to explain why Finland's students consistently rank top with low variance and moderate inputs among OECD countries across the range of criteria from reading to mathematics. Alongside the detailed analysis culled from many hours of interviews with teachers and principals and dozens of visits to school throughout the country, the author maps the educational landscape of Finland: the sector's history, culture, and development; its guiding principles, methodologies, and learning environments. The result is a cogent assessment of how and why Finland is universally regarded as a high grade educational exemplar. The volume provides the hundreds of researchers, teaching professionals, and policy makers who visit Finland in search of inspiration with essential background material on the country's magic educational ingredients, which include a highly motivated cohort of well-trained teachers, a recognition of the vital importance of early years education and nurture, functional and inviting learning environments, and a rejection of pedagogical dogma in favour of developing methodologies that produce results at the same time as fostering students' confidence and collegiality. At the same age, Finland's schoolchildren have roughly one less year of formal schooling than most of their international counterparts do not.

consider themselves to be overworked and rank alongside hot housed Singaporean or South Korean youngsters in international assessments of achievement They are the educational equivalent of world beating sports stars who make success appear effortless This volume lifts the lid on the hard work and careful planning that underpin their achievements
