Language and Institutional Identity in the Post-Apartheid South African Higher Education Leketi Makalela, 2022-03-21

This book examines the intersections between education identity formation and language in post apartheid South Africa with specific attention to higher education. It does so against the backdrop of the core argument that the sector plays a critical role in shaping re producing and perpetuating sectoral class sub national and national identities which in turn in the peculiar South African setting are almost invariably analogous with the historical fault lines determined and dictated by language as a marker of ethnic and racial identity. The chapters in the book grapple with the nuances related to these intersections in the understanding that higher education language policies overt and or covert largely structure institutional cultures or what has been described as curriculum in higher education institutions. Together the chapters examine the roles played by higher education by language policies and by the intersections of these policies and ethnolinguistic identities in either constructing and perpetuating or deconstructing ethnolinguistic identities upon which the sector was founded. The introductory chapter lays out the background to the entire book with an emphasis on the policy and practice perspectives on the intersections. The middle chapters describe the so called White Universities Black Universities and Middle Man Minorities Universities. The final chapter maps out future directions of the discourses on language and identity formation in South Africa's higher education.

International Handbook of Urban Education William T. Pink, George W. Noblit, 2008-09-03. It is evident that urban education has become the central focus of educators at the present time. In the U S for example almost one third of all school age children attend schools in large urban school districts. It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic. What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea. Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level. The universality of the problematics with urban education together with the importance of understanding the local or situated context of

improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education. An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region. An important question to be answered for example is what it takes in terms of resources, political will and policy actions to improve urban education.

Promoting Healthy Human Relationships in Post-Apartheid South Africa
 Ndangwa Noyoo, 2020-10-11. This is the first book that examines healthy human relationships in post apartheid South Africa. In contemporary South Africa human relationships are under considerable threat. Despite the 1994 commitment to an inclusive and human rights based democracy human relationships remain strained. Bearing in mind South Africa's tortuous and divisive past, this book brings to light many issues, prospects and challenges with regard to the promotion of healthy human relationships after apartheid ended. Social work and social development perspectives are central to the issues that are raised in this volume. The profession of social work has always championed the centrality of human relationships, being less interested in the internal functioning of people and more interested in their interpersonal functioning within broader structures and forces including social justice, building people's strengths and capabilities, anti-discrimination, diversity and empowerment. This edited book is based on select papers presented at a social work conference in 2019 that was co-hosted by the Department of Social Development at the University of Cape Town and the Association of South African Social Work Education Institutions. In the chapters, the contributors offer some solutions to the ubiquitous societal ills that emanate from either corrosive or broken human relationships. Resurgent racism in post apartheid South Africa and the need to promote healthy human relationships. Promoting healthy human relationships with sub-Saharan African immigrants and South Africans. Promoting family and human relationships in a traumatised society. Social policy, social welfare, social security and legislation in promoting healthy human relationships in post apartheid South Africa. Social protection as a tool to promote healthy human relationships in South Africa. Promoting Healthy Human Relationships in Post Apartheid South Africa is an essential resource for an international audience of scholars, policy makers and social work and social development practitioners, legislators and students.
