

SAMPLE LESSON PLAN

FOR MODULE 7 ACTIVITY: LESSON PLAN

Mathematics Learning Plan**Class: Precalculus****Grade: 11****Topic: Exponential and Logistical Modeling****Standard(s):****4.A.SSEA**

Interpret complicated expressions by viewing one or more of their parts as a single entity. For example, interpret $P(1+r)^n$ as the product of P and a factor not depending on P .

4.A.CEDA

Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.

4.A.REID

Explain why the x -coordinates of the points where the graphs of the equations $y=f(x)$ and $y=g(x)$ intersect are the solutions of the equation $f(x)=g(x)$; find the solutions approximately, e.g., using technology to graph the functions, make tables of values, or find successive approximations. Include cases where $f(x)$ and/or $g(x)$ are linear, polynomial, rational, absolute value, exponential, and logarithmic functions.

4.F.LEA

Recognize situations in which a quantity grows or decays by a constant percent rate per unit interval relative to another. Construct linear and exponential functions, including arithmetic and geometric sequences, given a graph, a description of a relationship, or two input-output pairs (include reading these from a table).

Essential Question/Goal(s):

- How can exponential and logistic functions be used to solve real-world problems?

Students will:

- Determine an exponential function model's growth or decay.
- Know the constant percentage rate of growth or decay of an exponential function.
- Write an exponential equation.
- Understand how to make predictions using an exponential function.
- Use a logistic function to make predictions about a population.
- Communicate with peers to apply exponential functions in real-world situations.

How will you know?

Students will complete a classwork assignment on exponential and logistic modeling. This assignment will be collected and graded. At the end of the lesson, students will write their own application problem that can be modeled using an exponential or logistic function.

Teachscape Sample Pdp
