Annual Report - Office of State Technical Services United States. Office of State Technical Services,1967 **The Harlem Renaissance and Transatlantic Modernism** Denise Murrell,2024-02-25 Beginning in the 1920s Upper Manhattan became the center of an explosion of art writing and ideas that has since become legendary But what we now know as the

Harlem Renaissance the first movement of international modern art led by African Americans extended far beyond New York City This volume reexamines the Harlem Renaissance as part of a global flowering of Black creativity with roots in the New Negro theories and aesthetics of Alain Locke its founding philosopher as well as the writings of W E B Du Bois Langston Hughes and Zora Neale Hurston Featuring artists such as Aaron Douglas Charles Henry Alston Augusta Savage and William H Johnson who synthesized the expressive figuration of the European avant garde with the aesthetics of African sculpture and folk art to render all aspects of African American city life this publication also includes works by lesser known contributors including Laura Wheeler Waring and Samuel Joseph Brown Jr who took a more classical approach to depicting Black subjects with dignity interiority and gravitas The works of New Negro artists active abroad are also examined in juxtaposition with those of their European and international African diasporan peers from Germaine Casse and Ronald Moody to Henri Matisse Edvard Munch and Pablo Picasso This reframing of a celebrated cultural phenomenon shows how the flow of ideas through Black artistic communities on both sides of the Atlantic contributed to international conversations around art race and identity while helping to define our notion of modernism

Whole Person Promotion, Women, and the

Post-Pandemic Era: Impact and Future Outlooks Crosby, Michelle,Faludi, Julianna,2022-05-20 The COVID 19 pandemic both accelerated social and household inequalities and made them more visible as the spatial and social divide between work and home life was broken down Historically during times of crisis or huge systematic change women have served as shock absorbers Shock absorption of systemic change by women as well as that of our planet s natural resources is not a new

phenomenon and this dynamic persisted even during state socialism however in the current institutional setups there seems to be no logical solution because of the orientation around marketization and externalization by central actors Currently during a time of great precarity in our digital revolution old institutions are still counting on women the planet and other vulnerable groups to support this transformation with no clear protection of whole personhood Whole Person Promotion Women and the Post Pandemic Era Impact and Future Outlooks provides the latest empirical research findings in the post pandemic era with the household as the central unit of analysis It improves understanding of how old institutions persist and are even reinforced during times of crisis as well as generates a discussion about to what extent there is variation in experiences how satisfied we are with these dynamics and what internal and external interactions we can attribute to the world that we envision Covering topics such as individual wellbeing platform capitalism and gender inequality this premier reference source is a dynamic resource for lawyers policymakers government officials politicians business leaders managers economists non profit organizations libraries students and faculty of higher education sociologists anthropologists researchers and academicians

Spectral Data for PCBs Tees,1994-06-15 PCBs have been produced commercially for a long time and for a variety of uses However their chemical and physical stability has been found to be responsible for the PCBs environmental contamination problem The discovery of widespread environmental occurrence of PCBs and their apparent link to carcinogenesis drew public attention to the problem leading to new legislation regulating PCBs Although regulations and requirements differ from country to country there is a common global analytical interest in determining their presence in the different matrices and in the environment The purpose of this book is to provide a comprehensive compilation of spectral data for the complete set of PCBs
