Gateway to The Heavens Karen L. French, 2014-05-20 Simple geometric shapes and symbols combine to make the universal powerful sacred model Karen French calls Gateway to the Heavens In this book French explains the meaning and purpose of these shapes how they mold our reality and perception of it and how they have a direct bearing on what you are and why you are here These shapes and symbols contain messages that have been consistently represented in religion philosophy mythology mysticism the arts and sciences Their messages are built into our genetic make up and we recognize them instinctively The book is divided up into 3 parts Part 1 covers the properties of the basic geometric shapes and numbers Part 2 describes how these in turn form layers of construction creating principals that are fundamental to the purpose of the universe the spiral sustains reality the cross highlighting the central point of existence and the heart is where we weigh up our choices Part 3 describes how we can use these principals to create positive change in

our lives by helping us to expand our awareness of reality

Process Thought and Roman Catholicism John Becker, Marc A. Pugliese, 2022-03-21 This collection of essays explores convergences and divergences between process thought and Roman Catholicism with the goal of identifying reasons for why process philosophy and theology has not had the same impact in Roman Catholic circles as in Protestantism and of constructively navigating avenues of promising engagement between Process thought and Roman Catholicism In creatively considering the Roman Catholic tradition from the vantage point of Process thought different theoretical perspectives are brought to bear on Catholic characteristics of historical theology fundamental theology systematic theology moral theology social justice and theology of religions While the contributors draw upon a broad range of resources from the disciplines of the physical and social sciences philosophy and ethics from a process perspective the primary methodology employed is theological reflection *The Voyage of Thought* Michael Wintroub, 2017-07-13 A journey in the history of science across the shifting religious epistemic and technical practices on a remarkable sixteenth century voyage

Veteran MPs and Conservative Politics in the Aftermath of the Great War Richard Carr, 2016-03-03 Between 1918 and 1939 448 men who performed uniformed service in the First World War became Conservative MPs This relatively high profile cohort have been under explored as a distinct body yet a study of their experiences of the war and the ways in which they and the Conservative Party represented those experiences to the voting public reveals much about the political culture of Interwar Britain and the use of the Great War as political capital Radicalised ex servicemen have thus far been considered a rather continental phenomenon historiographically And whilst attitudes to Hitler and Mussolini form part of this analysis the study also explores why there were fewer such types in Britain The Conservative Party it will be shown played a crucial part in such a process with British politics serving as a contested space for survivors interpretations of what the war should mean

Lasers in Cardiovascular Interventions On Topaz, 2015-11-05 Since the introduction of laser devices to the medical sciences this technology has created great interest Specifically the laser s unique physical properties and precise bio tissue interactions render this versatile source of biologic energy an attractive tool for multiple therapeutic purposes in cardiovascular medicine Over the course of the last 2 decades the utilization of laser technology has become an important component for the management of patients with complex cardiovascular diseases During this time period cutting edge laser technology including a variety of wave length generators newly designed catheters and a selection of advanced optic fibers have been introduced and applied in the cardiovascular circulation Improved lasing techniques in the cardiac catheterization suites and operation rooms have been implemented for treatment of ischemic coronary syndromes peripheral arterial occlusive disease and other atherosclerotic thrombotic conditions Moreover during this 20 year time frame several multicenter and single center clinical studies have been published focusing on the role and utilization of lasers in coronary and peripheral revascularization And within the rapidly expanding field of interventional cardiac electrophysiology laser technology has recently revolutionized the management of

fractured abandoned and malfunctioning leads of cardiac pacemakers and automatic defibrillators Consequently replacing a notoriously cumbersome and high risk open heart surgery with safe and markedly efficient percutaneous laser based extraction This textbook will provide the most authoritative comprehensive and contemporary information covering technological progress clinical experience and pertinent aspects of laser applications in cardiovascular medicine It will be of interest to cardiologists vascular surgeons and interventional radiologist as well as medical students scientists biomedical engineering students and graduates

The Man Without Content Giorgio Agamben,1999 In this book one of Italy s most important and original contemporary philosophers considers the status of art in the modern era He probes the meaning and historical consequences of the indefinite continuation of art in what Hegel called a self annulling mode in the process offering an imaginative reinterpretation of the history of aesthetics from Kant to Heidegger

The Roots of Evil Erwin Staub,1992-07-31 How can human beings kill or brutalise multitudes of other human beings Focusing particularly on genocide Erwin Staub explores the psychology of group aggression He sketches a conceptual framework for the many influences on one group s desire to harm another and within this framework considers four historical examples of genocide

Research and Innovation Forum 2024 Anna Visvizi,Orlando Troisi,Vincenzo Corvello,Mara Grimaldi,2025-07-26 This book features research presented and discussed during the Research Innovation Forum Rii Forum 2024 As such this book offers a unique insight into emerging topics issues and developments pertinent to the fields of technology innovation and education and their social impact Papers included in this book apply inter and multi disciplinary approaches to query such issues as technology enhanced teaching and learning smart cities information systems cognitive computing and social networking What brings these threads of the discussion together is the question of how advances in computer science which are otherwise largely incomprehensible to researchers from other fields can be effectively translated and capitalized on so as to make them beneficial for society as a whole In this context Rii Forum and Rii Forum proceedings offer an essential venue where diverse stakeholders including academics the think tank sector and decision makers can engage in a meaningful dialogue with a view to improving the applicability of advances in computer science
