The Global Academic Rankings Game Maria Yudkevich, Philip G. Altbach, Laura E. Rumbley, 2016-03-02 The Global Academic Rankings Game provides a much needed perspective on how countries and universities react to academic rankings Based on a unified case methodology of eleven key countries and academic institutions this comprehensive volume provides expert analysis on this emerging phenomenon at a time when world rankings are becoming increasingly visible and influential on the international stage Each chapter provides an overview of government and national policies as well as an in depth examination of the impact that rankings have played on policy practice and academic life in Australia Chile China Germany Malaysia the Netherlands Poland Russia Turkey the United Kingdom and the United States The Global Academic Rankings Game contributes to the continuing debate about the influence of rankings in higher education and is an invaluable resource for higher education scholars and administrators as they tackle rankings in their own national and institutional contexts

EBOOK: Managing Successful Universities Michael Shattock, 2010-09-16 There is no truer text to the topic than *Managing Successful Universities* The second edition is a full revision in which globalisation managing financial disjuncture and the enhancement of research performance all loom larger than before Like its predecessor this book will be used throughout the English speaking world and beyond Professor Simon Marginson Centre for the Study of Higher Education University of Melbourne This is the manual par excellence for modern university leadership and management In my role as a business school dean it is by far the most useful single book I have ever read and continue to read Professor Mark Taylor Dean Warwick Business School University of Warwick When I began my career in university management there was just one book on managing UK universities Now there must be twenty or thirty but none is as comprehensive authoritative readable and important as Shattock's *Managing Successful Universities* Read this valuable book and learn much from it David Palfreyman Director of OXCHEPS and Bursar New College University of Oxford This bestselling book defines good management in a university context and how it can contribute to university success Extensively updated to reflect political financial and social developments since the first edition it includes a new chapter on the management of teaching and research and gives in depth coverage to managing retrenchment and the importance of human resource management Drawing on the literature of management in the private sector as well as from higher education and on the experience of the author it emphasizes The holistic characteristics of university management The need to be outward looking and entrepreneurial in management style and The ways successful universities utilize the market to reinforce academic excellence

Quality Assurance in Higher Education David Lim, 2020-07-24 This title was first published in 2001 Universities in developing countries have followed their counterparts in developed countries and adopted quality assurance to improve the quality of their activities This text examines the wisdom of such a move when many of the conditions necessary for its success are not present It concludes that quality assurance can be useful in developing countries because it

shows how a university's seemingly disparate activities are related to one another to serve a common goal and how the quality of these can best be improved by using an integrated approach. Quality assurance also provides more focus and direction to the work of the traditional university system. However, it must be modified to suit the conditions prevailing in developing countries by being simple in design, modest in expectations, and realistic in requirements. **The Impact of**

Higher Education Ranking Systems on Universities Kevin Downing, Petrus Johannes Looock, Sarah Gravett, 2021-04-04

This book, written by three generations of rankings academics with considerable experience from three very different regions of the globe, lifts the lid on the real impact of higher education ranking systems (HERS) on universities and their stakeholders. It critically analyses the criteria that make up the Big Three global ranking systems and, using interviews with senior administrators, academics, and managers, discusses their impact on universities from four very different continents. Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS. Despite all the opinions and arguments about the legitimacy of the rankings as a construct, it seems experts agree that they are here to stay. The question therefore seems to be less about whether or not universities should be compared and ranked, but the manner in which this is undertaken. Delivering a fresh perspective on global rankings, this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions: South Africa, the Arab region, South East Asia, and Australia. It will appeal to any academic, student, university administrator, or governing body interested in or affected by global higher education ranking systems. **E-tivities** Gilly Salmon, 2013-06-19

The world of learning and teaching is at a watershed, confronted by challenges to previous educational models. One learning future lies in impactful, purposeful, active online activities or e-tivities that keep learners engaged, motivated, and participating. Grounded in the author's action research, *E-tivities 2nd Edition* assuredly illustrates how technologies shape and enhance learning and teaching journeys. In this highly practical book, Gilly Salmon maintains her exceptional reputation, delivering another powerful guide for academics, teaching professionals, trainers, designers, and developers in all disciplines. This popular text has been comprehensively updated, addressing key technological changes since 2002, offering fresh case studies and *Carpe Diem*, a unique approach to learning design workshops. Readers will find *E-tivities 2nd Edition* a wonderful resource on its own or as a companion to the author's bestselling *e-Moderating 3rd Edition*. Reconceptualising Evaluation In Higher Education: The Practice Turn Saunders, Murray, Trowler, Paul, Bamber, Veronica, 2011-05-01 This book evaluates the impact of projects to improve teaching and learning in Higher Education, focusing on evaluative practice. **Consuming Higher Education** Joanna Williams, 2013-01-17 Reflects on the link between constructing students as consumers and the purpose of higher education and the implications for student identity and learning. **On Chester On** Graeme J. White, 2015-05-19 Although there has been a University of Chester only since 2005, its predecessor Chester College dates back further than most UK universities to 1839. This book celebrates the 175th

anniversary of the foundation in 2014 The story is a remarkable one of survival and success The early College was a pioneering venture with a unique approach to learning and the University still houses the first buildings in England specifically designed for the training of teachers Three times in the 1860s the 1930s and the 1970s Chester College came near to closure only repeatedly to emerge intact and to become stronger than before In the early twenty first century the University has a growing reputation within the higher education sector and can claim some of the highest rates of student satisfaction in the country The book s title is taken from the College motto of the late Victorian and Edwardian period as appropriate today as when it was coined

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

Marketing Higher Education Maringe, Felix, Gibbs, Paul, 2008-12-01 This book examines marketing from both the market and educational perspectives and offers a view of its value and use within this dialectic relationship In this respect this book is distinctive

Multidimensional Ranking Frans A. van Vught, Frank Ziegele, 2012-02-22 During the last decades ranking has become one of the most controversial issues in higher education and research It is widely recognized now that although some of the current rankings can be severely criticized they seem to be here to stay In addition rankings appear to have a great impact on decision makers at all levels of higher education and research systems worldwide including in universities Rankings reflect a growing international competition among universities for talent and resources at the same time they reinforce competition by their very results Yet major concerns remain as to the rankings methodological underpinnings and to their various impacts This new book presents a comprehensive overview of the current state of the art of ranking in higher education and research and introduces a completely new approach called multidimensional ranking In part 1 rankings are discussed in the broader context of quality assurance and transparency in higher education and research In addition the many current ranking methodologies are analyzed and critized and their impacts are explored In part 2 a new approach to ranking is introduced based on the basic idea that higher education and research institutions have different profiles and missions and that the performances of these institutions should reflect these differences This multidimensional approach is operationalized in a new multidimensional and

user driven ranking tool called U Multirank U Multirank is the outcome of a pilot project sponsored by the European Commission in which the new ranking instrument was designed and tested at a global scale

Learning Marketplace, The: East Meets West In Singapore Prem Kumar, 2015-09-23. In Asia we are witnessing an era where the pendulum of power seems to be swaying towards the East with the rising strength of China and India and Singapore is at the crossroads between these populous nations. Although Singapore may appear to be the most westernized country in Asia, she is nevertheless a multi-cultural Asian society. Having the most open economy in the world, Singapore is plugged into the global marketplace of education and learning. The development of human capital is used as a strategic economic driver to internationalize and transform education for sustainable competitive advantage. Singapore's education system, regarded as one of the consistently best performing in the world, offers a unique opportunity to explore issues where eastern and western culture, values, beliefs, learning and knowledge systems converge, clash and at times diverge. This book is meant to extend our knowledge on the role of learning, often overlooked and taken for granted as the air that we breathe but which constantly transforms our lives and reshapes societies. It is the first book that deals with the dichotomy of east and west, going beyond the traditional learning and education framework to other areas such as economic, socio-cultural, political and technological dimensions that impact Singapore. It puts together key topical issues and explores the underbelly of how a small, resourceless independent city-state like Singapore stays ahead of the learning curve even while facing increasingly intense global competition where the discovery and emergence of new systems for empowerment and independence and the resulting creation of new knowledge and modes of communication are challenging traditional boundaries between the virtual and real world.

Governing Universities Globally Roger King, 2009-01-01. *Governing Universities Globally* provides a comprehensive account of higher education in the world today and successfully demonstrates how the study of universities now needs to acknowledge the global environment. Andrew Steven Gunn, Political Studies. Roger King examines how universities as increasingly autonomous organizations are subject to forms of global governance that rely particularly on private and peer processes rather than legal command and compliance. The book explores the growing influence of global regulatory governance, governmental and private, on universities and national higher

education systems It considers processes of purposeful standardization normative internalization and markets as solutions for coordination and collective action problems as well as hierarchical command A range of university systems world models and organizations particularly those associated with Europe and the OECD are examined with particular emphasis on the growth of national and global league tables and similar rankings of higher education institutions as a form of regulation Governance globally is found to operate through steerage networks deliberation and communities of the knowledgeable and the expert The comprehensive coverage of global university governance includes conceptual theoretical and empirical analyses that will be invaluable to higher education researchers and students and to public policy academics students and practitioners Global governance analysts global business and management postgraduates as well as regulation theorists and practitioners will also find this book to be of great interest Rankings and the Reshaping of Higher Education Ellen Hazelkorn, 2015-03-23 University rankings have gained popularity around the world and are now a significant factor shaping reputation This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective drawing in new original research and extensive analysis It is essential reading for policymakers managers and scholars

Surviving the Future Gail Munde, Kenneth Marks, 2009-02-28 Every academic library strives to make improvements in its services its effectiveness and its contributions to overall university success Every librarian wants to improve library quality but few are knowledgeable or enthusiastic about the means and mechanisms of quality improvement This book assists librarians to make sense of data collection assessment and comparative evaluation as stepping stones to transformative quality improvement Creating value lies in a library's ability to understand communicate and measure what matters to users and what can be measured can be managed to successful outcomes Complex and fragmented subject matter is synthesized into clear and logical presentation Focuses on current research and best practices International in scope
