

Tissue-Tek Prisma® Plus

Automated Slide Stainer

Quick Reference Guide

Version : 2019-1

The Tissue-Tek Prisma® Plus automated slide stainer is an instrument that simultaneously carries out multiple staining protocols on slides containing sections that are acquired from fresh or fixed material. The instrument, as part of the histopathology process, is intended to facilitate the in vitro examination of human and animal tissue for morphology changes by a pathologist.

This Quick Reference Guide contains information about day-to-day use, maintenance and cleaning. For more detailed information we refer to the most recent Operating Manual of this instrument.

All users should be trained for the use of the Sakura instruments. The Sakura User Training is a training to ensure that new and existing users of a Sakura instrument have the knowledge and skills to operate and maintain the instrument in a proper way.

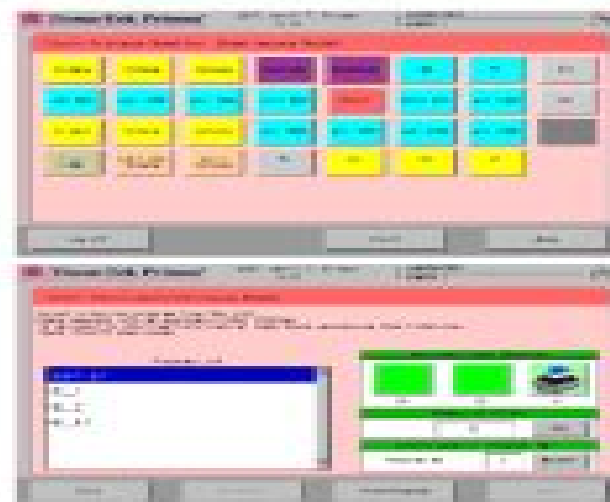

Daily operations

To operate the instrument start with entering the password on the touch screen display.

Note: Ensure that the reagents within the instrument match the current or desired configuration before starting a program.

The door at the bottom of the hood gives access to the start stations. While loading these pay attention to the orientation of the basket, the "upside" should face right. The instrument can be loaded with two types of baskets containing either 10 or 20 slides.

The starting procedure explained below is an example. If the instrument has been set to start upon closing of the door, you do not need to touch the start key. By pressing the Start key in the main screen a menu appears from where the staining protocol, the location of the basket, number of slides and coverslipper program are selected. The last two options will only appear when certain user defined settings are met.
