Maria Montessori: Her Thoughts and Her Beliefs for Today Vickie Jacob, 2024-11-26 Maria Montessori along with many other enlightened thinkers of our time foresaw nothing less than the emergence of a new human culture In Maria Montessori's time hers was a futurist vision She puts forth her vision in her books such as *The Formation of Man To Educate the Human Potential* and *Education for a New World* Once we understand what is happening to education in the public schools we begin to wonder if this endless nightmare will have some light shed later on down the road not in just knowing about the Montessori schools but the bigger problem of the system that has been implemented today When the government attempts to impose a set of values it will always countermand some parents authority and often ignites a school war America was founded and built on God's principles and over a hundred fifty years experience shows that we cannot have a society that is both free and peaceful when legislators use schools to shape attitudes or control the content of students minds These wars are over whose values are being taught We're seeing a system that has too many cracks in it to be fixed Is God speaking to America Perhaps because our watchmen have gone to sleep About the Author A mother of three children and four grandchildren Vickie Jacobs is retired and spends much of her time with gardening ducks chickens and many dogs Raising children brought her into contact with educators and seeing a lot of changes since her own school days Vickie is very grateful to her husband and family who encouraged her with this work

Maria Montessori's Erdkinder Ela Eckert, 2022-10 Adolescents need a school that is not a school This claim by Maria Montessori dating from the 1930s is increasingly shared today Consistently based on the developmental needs in adolescence Maria Montessori designed the concept of a Center for Study and Work in the Countryside for students aged 12-18 years which gives young people the opportunity to learn about the basic structures of production trade and services in a manageable transparent and at the same time protected setting through Practice Theory linked experiences The book presents the basics of Maria Montessori's concept and gives through reports with practitioners and interviews with Montessori experts insights into authentic implementations of the Farm school concept and thus into a learning arrangement that allows young people a high degree of responsibility and participation and strengthens their commitment to a sustainable approach to natural resources and a peaceful way of living The book also addresses schools without a Farm school practice and shows ways of approaching crucial components of this authentic and highly topical concept

Habibi, 2013-03-14. In this well-researched, comprehensive study of J.S. Mill, Professor Habibi argues that the persistent dominant theme of Mill's life and work was his passionate belief in human improvement and progress. Several Mill scholars recognize this; however, numerous writers overlook his growth ethic, and this has led to misunderstandings about his value system. This study defines and establishes the importance of Mill's growth ethic and clears up misinterpretations surrounding his notions of higher and lower pleasures, positive and negative freedom, the status of children, the legitimacy of authority, and support for British colonialism. Drawing from the entire corpus of Mill's writings, as well as the extensive secondary literature, Habibi has written the most focused, sustained analysis of Mill's grand leading principle. This book will be useful to college students in philosophy and intellectual history, as well as specialists in these fields. *The Winged Serpent* Marilyn L. Kraft, 2015-04-02. My search for meaning uncovered a secret brain program in charge of moral development. A roadmap to enlightenment comes through the unique language of symbolism that has long been forsaken. This foreign tongue reveals the nature of divinity and truth of existence. It shows us who we really are, not who we think we are. A metaphoric component silently transforms a base consciousness to all-knowing awareness by converting power to love. Success in transforming an animal species to human status comes by attaching an integrated brain to a compassionate heart. Otherwise, life gets nasty, as evidenced in bias, prejudice, bigotry, and profiling. Projections of how we feel about ourselves translate into how we treat others. Awakening to reality after a long slumber in fantasy is essential to raise our level of consciousness and our degree of self-awareness. A higher mental state is under construction. It needs our help to end the destruction and suffering our blindness causes. Blindness will be lifted by an involuntary change in vision.
