is commonly taken to be about another world one that transcends this one Instead I would say that transcendence is about unanswerable questions and unanswerable questions arise naturally in human life We deal with them without answering them or answer them only with irony for example in the comic strips but philosophers are usually loath to admit that there even are any unanswerable questions Philosophy of religion usually starts with familiar questions such as Is there a God and the like That's kind of like Do neutrinos exist or Is there a luminiferous ether Begin instead with more basic questions What is your idea of ultimate reality What does it mean to succeed in life Where does your ultimate reality show itself in life and the world Unanswerable Questions is the sequel to The Accountant's Tale **The Meaning of Life** J. was pure when the sun reigned down The peaks upon the mountains of knowledge were still concealed behind mist and covered with untrodden snow Only the strong could bear to climb them and now it seems such mountains have become small
