

Tom Ackroyd

A woman with long dark hair, wearing a grey beanie and a dark jacket, is shown from the chest up. She is holding a large, silver, serrated knife in front of her, with the blade pointing towards the right. Her eyes are closed and her mouth is slightly open, as if she is in a state of intense emotion or pain. The background is a warm, textured wall.

Killer Data Enzo Yaksic, 2022-04-19 Killer Data examines the phenomenon of serial murder using data collected from international sources to review offender patterning with a focus on contemporary cases This type of attention will allow for a broader understanding of modern day serial murderers and will

help to dispel some of the myths that surround offenders The current serial murder classification scheme incorrectly types serial murderers as supremely intelligent killing machines while discounting their socialization experiences and choices This book exposes serial murderers as run of the mill hometown losers who brutalize women and are lucky to escape apprehension Like other atypical homicide offenders modern day serial murderers are propelled forward by a deep sense of entitlement easy access to firearms and a nonchalant attitude toward using murder to attain their goals Readers should come away with a deeper understanding not of the ultra rare or the deadliest serial murderers but of the more common offenders who pose a consistent threat to day to day life The book utilizes the Consolidated Serial Homicide Offender Database one of the largest and most robust open access databases of multiple murders available presenting new thinking on areas such as myths and stereotypes the impact of entertainment on the perception of serial murder inaccurate prevalence estimates spree serial hybrid offenders the classification of two and three victim serial murderers how serial murderers pursue longevity the characteristics of aspiring serial murderers whether hit men and gang members are serial murderers if and why serial murder is in a state of decline how many serial murderers are responsible for the homicides that sent innocent people to prison luck as a factor of success for serial murderers These findings are illustrated with 200 narrative vignettes of serial murder series that occurred between 2011 and 2021 such as Itzcoatl Ocampo Charles Severance Nikko Jenkins and Pamela Hupp offenders who may be unfamiliar to many but represent the next iteration of the serial murderer Correcting decades of flawed assumptions about serial murderers and written in an accessible and concise style Killer Data is essential reading for students and scholars of criminal justice and criminology law enforcement professionals and the interested general reader

Mind Shift John Parrington, 2021-04-22 John Parrington argues that social interaction and culture have deeply shaped the exceptional nature of human consciousness The mental capacities of the human mind far outstrip those of other animals Our imaginations and creativity have produced art music and literature built bridges and cathedrals enabled us to probe distant galaxies and to ponder the meaning of our existence When our minds become disordered they can also take us to the depths of despair What makes the human brain unique and able to generate such a rich mental life In this book John Parrington draws on the latest research on the human brain to show how it differs strikingly from those of other animals in its structure and function at a molecular and cellular level And he argues that this shift enlarging the brain giving it greater flexibility and enabling higher functions such as imagination was driven by tool use but especially by the development of one remarkable tool language The complex social interaction brought by language opened up the possibility of shared conceptual worlds enriched with rhythmic sounds and images that could be drawn on cave walls This transformation enabled modern humans to leap rapidly beyond all other species and generated an exceptional human consciousness a sense of self that arises as a product of our brain biology and the social interactions we experience Our minds even those of identical twins are unique because they are the result of this extraordinarily plastic brain exquisitely shaped and tuned by the social and cultural

environment in which we grew up and to which we continue to respond through life Linking early work by the Russian psychologist Lev Vygotsky to the findings of modern neuroscience Parrington explores how language culture and society mediate brain function and what this view of the human mind may bring to our understanding and treatment of mental illness
