The Next Generation of Responsible Investing Tessa Hebb, 2011-11-09 In the face of the recent financial crisis, there is increased focus on long term investment strategies. This is particularly true for institutional investors who manage our retirement savings. Simultaneously, there is increased demand that financial assets be invested with an understanding of long term environmental and social sustainability. Responsible investing provides a long term sustainable investment strategy that values environmental, social, and governance (ESG) factors in investment decision making. Responsible Investing has always had a broad mandate. Put simply, it is a long term sustainable investment strategy that seeks to reduce risk in investment portfolios through managing ESG issues in today's corporations. *The Next Generation of Responsible Investment* explores this topic in an edited volume intended for those with an interest in finance and business.

It contains detailed analysis of the leading cases involving the Hazelwood power station, the Anvil Hill Xstrata, and Bowen Basin coal mines, and the Bald Hills and Taralga wind farms. *Climate Law in Australia* explores both the need for conventional legal regulation and the potential of economic responses to climate change.
