Hindman explain how to take the guesswork out of hiring decisions Their Teacher Quality Index TQI is a structured research based interview protocol built on the quality indicators explored in Stronge s best selling Qualities of Effective Teachers Here educators with hiring responsibilities will find interview questions that reveal what they most need to know about teacher candidates and question specific descriptive rubrics that support consistent evaluation of candidates responses The Teacher Quality Index is the easiest most reliable way to see that new hires possess both the personal qualities essential to effective teachers and the requisite proficiencies in classroom management instructional planning and delivery and the monitoring of student progress and potential An accompanying CD ROM provides forms and scoring rubrics for both screening interviews and building based interviews The question sets are presented in multiple configurations variations for experienced and novice teachers as well as interviewer s choice formats which allow for additional customization Protocol guidelines succinct discussions of underlying research and response rating exercises ensure readers will come away with the rationale know how and tools to implement this teacher selection process and ultimately increase the overall effectiveness of their teaching staff Note This product listing is for the Adobe Acrobat PDF version of the book

Connecting Abstract Algebra to Secondary Mathematics, for Secondary Mathematics Teachers Nicholas H. Wasserman, 2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics

Jenlink,2022-04-01 Today the meaning of literacy what it means to be literate has shifted dramatically Literacy involves more than a set of conventions to be learned either through print or technological formats Rather literacy enables people to negotiate meaning The past decade has witnessed increased attention on multiple literacies and modalities of learning associated with teacher preparation and practice Research recognizes both the increasing cultural and linguistic diversity in the new globalized society and the new variety of text forms from multiple communicative technologies There is also the need for new skills to operate successfully in the changing literate and increasingly diversified social environment Linguists anthropologists educators and social theorists no longer believe that literacy can be defined as a concrete list of skills that people merely manipulate and use Rather they argue that becoming literate is about what people do with literacy the values people place on various acts and their associated ideologies In other words literacy is more than linguistic it is political and social practice that limits or creates possibilities for who people become as literate beings Such understandings of literacy have informed and continue to inform our work with teachers who take a sociological or critical perspective toward literacy instruction Importantly as research indicates the disciplines pose specialized and unique literacy demands Disciplinary literacy refers to the idea that we should teach the specialized ways of reading understanding and thinking used in each academic discipline such as science mathematics engineering history or literature Each field has its own ways of using text to create and

communicate meaning Accordingly as children advance through school literacy instruction should shift from general literacy strategies to the more specific or specialized ones from each discipline Teacher preparation programs emphasizing different disciplinary literacies acknowledge that old approaches to literacy are no longer sufficient Literacy in Teacher Preparation and Practice Enabling Individuals to Negotiate Meaning introduces the reader to a collection of thoughtful research based works by authors that represent current thinking about literacy across disciplines and the preparation of teachers to enter classrooms Each chapter focuses on teaching guided by literacies across disciplines and the preparation of teachers who will enter classrooms to instruct the next generation of students

Contemporary Perspectives Through Action Research

Across Educational Disciplines Nancy T. Nasr, Jill Alexa Perry, 2023-03-01 The mission of the Action Research Across Educational Disciplines series is to present targeted volumes of action research findings from a wide variety of educational settings Specifically this series aims to highlight the issues that commonly impact practitioners counselors administrators and other stakeholders in education The rationale for such a series comes from the continually evolving educational landscape resulting from changing student demographics and societal needs To face the contemporary issues that surface as a result of this changing educational landscape educators must prepare for and lead through the change with an intent on overcoming these issues through improvements to their daily practice As many educators are left without tools or resources to make a stronger impact in their educational contexts this series will serve as a mentor text that provides examples of studies undertaken by practitioners using action research to improve their practice As a result Action Research Across Educational Disciplines will present the tools and findings associated with action research to educators across the broad field of K 12 education and beyond wishing to improve and transform their practice This first volume of the Action Research Across Educational Disciplines series presents action research findings from a wide variety of K 12 disciplinary settings In doing so the first volume of this series aims to highlight the issues that commonly impact practitioners in K 12 STEM English Social Science and even Art classrooms and illustrate the solutions proposed in these contexts to improve both educator practice and student achievement Through the use of action research methodologies to address such issues volume one of this series offers a resource for improving educational practice across diverse K 12 contexts
