

# ENDOCRINE

- s - g - s - + - e - m (part one)

## PURPOSE + FUNCTION

**maintaining homeostasis**  
- blood composition and volume - ex: glucose, uptake from bloodstream to blood.

**controlling reproductive activities**  
- development, function, and expansion

**controlling development**  
- growth, cell maturation, and anabolism of proteins, carbs + lipids

## COMPOSITION and ORGANS

**composition**  
- secretory endocrine cells  
- extensive blood supply  
- rapid uptake of hormones + easy transportation

**organization**  
- primary endocrine organs  
- secondary endocrine organs

### Primary endocrine organs

- Pituitary
- Parathyroid
- Pineal
- Thyroid

### Adrenal glands

### Secondary endocrine organs

- Hypothalamus
- Skin
- Heart
- Kidneys
- Ovaries
- Testes
- Liver
- Adipose tissue

## TRANSPORT HORMONES

**water-soluble**

- readily diffuse  
- easy transport through blood  
- ex: proteins + biogenic amine, modified amino acids

**Ex: steroid**  
**lipid-soluble**

- steroid molecule's released  
- diff. and binding to intracellular or membrane

## COMPARED to nervous sys.

### ADRENAL

1. Speed - med: (example: jump, or flee)
2. Affect: immediate: stress, anger, nervous
3. Response time: quick
4. Range of effect: broad
5. Duration of response: fast (ex: jump, heart)

### ENDOCRINE

1. Speed - med: slow
2. Affect: slightly cells on the same target
3. Response time: slow (ex: blood sugar, etc)
4. Range of effect: all over
5. Duration of response: long (ex: ex: stress, nervous, years)

### NEURAL

- increase of hormones in response to neural stimulation

**Ex: transport of hormones**  
- transport of hormones by blood  
- transport of hormones by lymphatic system

## STIMULATION OF hormones

### HUMORAL

- change in local environment that causes release of hormone

### ENDOCRINE

- release of hormone in response to another hormone (release, chain reaction)

ex: TSH causes release of TH

## INTERACTIONS with HORMONES

### RECEPTORS

1. Synergistic: one hormone reinforcing another. Ex: Prolactin + progesterone
2. Permissive: one hormone requires another. Ex: thyroxine + progesterone
3. Antagonistic: one hormone opposing effect of other. Ex: glucagon + insulin

**Lipid-soluble hormone interaction**  
- bind to intracellular receptors  
- hormone receptor complex

**water-soluble hormone interaction**  
- receptors on cell surface to bind  
- activates series of intracellular events  
- results in cell plasma membrane

## HORMONE CATEGORIES

### AMINO ACID DERIVATIVES

- water-soluble  
- modified amino acids (eg: tyrosine)

### PROTEIN

- ex: PTH  
- water-soluble  
- amino acid chains  
- 5-100 amino acids  
- ex: insulin, growth hormone

### STEROID

- lipid-soluble  
- from cholesterol  
- produced by gonads + adrenal cortex  
- ex: cortisol

Learning, Creating, and Using Knowledge Joseph Donald Novak, 2010 This fully revised and updated edition of Learning Creating and Using Knowledge recognizes that the future of economic well being in today s knowledge and information society rests upon the effectiveness of schools and corporations to empower their people to be more effective learners and knowledge creators Novak s pioneering theory of education presented in the first edition remains viable and useful This new edition updates his theory for meaningful learning and autonomous knowledge building along with tools to make it operational that is concept maps created with the use of CMapTools and the V diagram The theory is easy to put into practice since it includes resources to facilitate the process especially concept maps now optimised by CMapTools software CMapTools software is highly intuitive and easy to use People who have until now been reluctant to use the new technologies in their professional lives are will find this book particularly helpful Learning Creating and Using Knowledge is essential reading for educators at all levels and corporate managers who seek to enhance worker productivity Chapter Resource

42 Hormones/Endocrine Biology Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2004 **Cases on Teaching Critical Thinking through Visual Representation Strategies** Shedletsky, Leonard J., Beaudry, Jeffrey S., 2014-03-31 One of the most important aspects of a comprehensive education involves teaching students to analyze arguments and form their own opinions based on available information Visual and graphical mapping strategies are useful in helping students to consider problems from a variety of perspectives Cases on Teaching Critical Thinking through Visual Representation Strategies brings together research from scholars and professionals in the field of education to provide new insights into the use of visual aids for student development in reasoning and critical thinking This essential reference source will enable academics researchers and practitioners in fields such as education business and technology to more effectively foster students critical thinking skills **You CAN Teach Advanced Med-Surg Nursing!** Mary Miller, Deborah

Wirwicz, 2014-08-18 This is the first comprehensive resource for clinical medical surgical nursing instructors responsible for guiding students through their entire clinical rotation Filling a huge gap in resources for instructors required to teach the medical surgical nursing course it contains everything the new or adjunct instructor needs to teach expertly and confidently The guide features a week by week instructional plan for the clinical rotation and includes all materials necessary to effectively perform administrative leadership and supervision assess students knowledge and learning styles maximize the learning process simplify evaluation and help ensure a smooth transition to clinical practice The guide will serve as a welcome companion to both experienced and novice medical nursing instructors with its week by week instruction guide that encompasses organizational teaching templates teaching and learning resources and evaluation materials These include everything from the Adjunct Faculty Contract to the Course Syllabus to a Comprehensive Skills Checklist Key clinical instruction materials including PowerPoints and simulation scenarios are provided for each body system Additionally the

book contains quizzes with answers discussion questions and interactive student activities and exercises Key Features  
Comprises the first complete resource for successfully guiding students through their clinical rotations from start to finish  
Helps to allay the fear factor for new and adjunct clinical nursing instructors Provides a week by week instructional guide  
that includes organizational teaching templates teaching and learning resources and evaluation aids Includes numerous  
forms and templates to facilitate administrative responsibilities student assessment and student evaluation Key clinical  
information is organized by body system and includes multiple interactive teaching tools     **Learning Elementary Biology**  
**8 Solution Book (Year 2023-24)** ,2024-01-02     The Present and Future of Immunology Education Andrea  
Bottaro,Deborah M. Brown,John Gregory Frelinger,2022-01-24 The explosion of basic and applied immunology in the first  
decades of the 21st century has brought forth new opportunities and challenges for immunology education at all academic  
levels from professional to undergraduate medical graduate and post graduate instruction Moreover developing methods and  
techniques for educating general audiences on the importance and benefits of immunology will be critical for increasing  
public awareness and support One major immediate challenge consists in accommodating within the confines of traditional  
immunology curricula a body of knowledge that continues to grow exponentially in both size and complexity Furthermore the  
practical toolbox of immunological research has vastly expanded and even in the present environment of highly  
interdisciplinary and collaborative science future immunologists will likely need to be at least conversant in for instance  
computational structural and system biology nanotechnology and tissue engineering At the same time our perspective of the  
immune system has progressively developed from primarily a host defense mechanism to a fundamental homeostatic system  
with organism wide physiological and clinical significance and with potentially transformative biotechnological and  
therapeutic applications As a consequence in addition to stand alone courses immunology is increasingly integrated into  
other courses or distributed longitudinally throughout a multi year curriculum This necessitates inter disciplinary approaches  
to reach an expanding range of disciplines as diverse as neurobiology cancer biology oncology infectious diseases  
pharmacology orthopedics and bioengineering Creative approaches and pedagogical flexibility will be needed to avoid the  
pitfall of one size fits all instruction and to tailor level and discipline appropriate content to different types of students using  
multiple teaching formats Finally like most other disciplines immunology education is also under strong pressure to introduce  
new didactic strategies that are relevant and meaningful to a generation of students who are digital natives comfortable with  
and expect on demand and multi modal learning diversified sources and active engagement Thankfully the dynamic and  
interactive behavior of immune system cells now visualized with striking immediacy by in vivo imaging has the ability to  
capture and hold the interest of even the most jaded learner The need for an increasingly immunology knowledgeable  
workforce not just academic and industry scientists but also clinical and research lab technicians biomedical engineers and  
physicians in a growing array of specialties will also expand job opportunities for immunologists as educators and for content

creators dedicated to generating new didactic tools in this field Acknowledgement We acknowledge the initiation and support of this Research Topic by the International Union of Immunological Societies IUIS
