

TEACHING EXPERIENCE AND REFLECTION

Saleema Gulzar¹, Shahid Shamim MF², Catherine Lobo³

ABSTRACT

The standard of education can be improved if educators actively assess themselves or have someone else evaluate their teaching skills. Reflection on multiple aspects of teaching can be used as a powerful tool for worldwide educationists. Teaching, particularly in nursing discipline, strives to move beyond the simple divulgence of facts and knowledge. It widens student's horizons, stimulates their intellects, and teaches them to become self directed. This manuscript is a qualitative review of observations in a class of nursing with context to teaching skills and its impact on students' interest in learning during the class. The authors have used their reflections to discuss the ways to improve teaching methodology and related them with various teaching learning theories.

KEY WORDS: Reflection, Teaching strategies, Humour in teaching, Role play, Teaching theories, Self directed learning, Teaching and learning principles, Andragogy approach.

INTRODUCTION

"The task of the excellent teacher is to stimulate apparently ordinary people to unusual effort. The tough problem is not in identifying winners: it is in making winners out of ordinary people" (K. Patricia Cross).

Teaching is not merely to reform students or to make them expert technicians, it is to widen their horizon; inflame their intellects; and teach them to be self directed. Therefore teaching in any discipline and particularly in nursing, should always strive to move beyond simply divulging of facts and knowledge or even training of certain skills. Instead, teachers have the broad responsibility of serving as guide and mentor on an intellectual journey, opening and broadening curious minds by exposing students to creative thoughts and ideas. This manuscript was prepared after observing a class of nursing students, conducted by one of the authors, as a reflective process of faculty in order to portray learning experiences for better teaching methods.

METHODOLOGY

There were 33, third year diploma nursing, students in the session/ class being observed for reflections. Teacher was a trained faculty with 25 years of teaching experience. The topic
