

YOUR GUIDE TO THE GREAT MIGRATION

The 'Great Migration' is the world's most thrilling wildlife spectacle and a true highlight for any traveller to East Africa. Every year millions of zebra, wildebeest and other antelope follow a nine-month cycle of movement across the mighty plains of Tanzania in search of fresh grazing. Predators following the herds pick off the weak and young, with hungry crocodiles lurking in the waters waiting for the herds to cross the rivers. This is the stuff of National Geographic - be there and see it all happen!

The Journey

The migration herds travel in a clockwise direction as the trek begins in the southern part of Tanzania's Serengeti, traveling north into Kenya on a journey of over 800 kilometres. More than 1.5 million wildebeest, 400,000 zebra, 18,000 eland and 200,000 Thompson's gazelle assemble to form the world's largest overland mammal migration. Our map shows the approximate route of the annual migration.

Timing

As the migration is influenced by the pattern of rainfall, the exact timing of the trek changes from year to year. Where there is rain, there are fresh pastures to feed on! The initial phase begins during calving season, approximately January to March. Between late June and October the river crossings take place, but it is also good to know that there is wonderful wildlife viewing year-round.
