Milford,2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada s successes The book highlights commonalities consistencies and

distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education

In *Is This Opportunity From God?* reflecting on scripture and personal experience, Joseph lays out 7 checkpoints to help the reader discern if an opportunity is indeed from God or just another distraction from God's best plan. In *Marriage in View*, Joseph and Anu through their love story draw young people to engage with the tested and timeless countercultural principles upon which the institution of marriage is established. In *Waiting Compass*, Joseph presents 5 pieces of transformational thoughts helping the reader to find God when He seems to delay. And in *Unaddicted*, Joseph shares some liberating thoughts on how to overcome sexual addictions, sharing unreservedly from his journey through the same struggles.
