**Education, Work and Social Change in Britain's Former Coalfield Communities** Robin Simmons, Kat Simpson, 2022-10-17 This edited book presents a range of chapters written by new and established authors drawing on a range of different perspectives and traditions to critically analyse education work and social change in the former coalfields. Historically coal was one of Britain's major industries employing over a million men at its peak. But mining was more than an occupation; it was a way of life for those living and working in coalfield communities. Work, leisure, family relations and other dimensions of social life were centred upon the coal industry and its related institutions such as trade unions, working men's clubs and welfare institutes. These communities have however undergone significant social and economic change over time, not least in terms of the pain and suffering associated with the Great Strike of 1984-85, the successive waves of pit closures which took place thereafter and the eventual demise of the coal industry. The book will be of interest to academics drawing on sociology, social policy, history, geography and other subject disciplines.

This book gathers the proceedings of the fifteenth International Conference on Management Science and Engineering Management (ICMSEM 2021) held on August 1-4, 2021 at the University of Castilla-La Mancha (UCLM) Toledo, Spain. The proceedings contain theoretical and practical research on decision support systems, complex systems, empirical studies, sustainable development, project management and operation optimization, showing advanced management concepts and demonstrating substantial interdisciplinary developments in MSEM methods and practical applications. It allows researchers and practitioners in management science and engineering management (MSEM) to share their latest insights and contributions. Meanwhile, it appeals to readers interested in these areas, especially those looking for new ideas and research directions.
