The Numeral Systems of Nigerian Languages Ozo-mekuri Ndimele,S.L. Chan,2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt Nigeria The workshop arose from awareness created by Dr Eugene S L Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages The quantum of mathematical computations addition multiplication subtraction or a combination of two or all of these involved in the numeral systems of Nigerian languages is remarkable The papers reveal that a variety of numeral systems do exist such as binary decimal incomplete decimal duodecimal quinary quaternary ternary mixed body part tally systems and much more The book is a resource about how different languages manipulate their numeral systems Journal of the Chemical Society ,1985

Moving toward Universal Coverage of Social Health Insurance in Vietnam Aparnaa Somanathan,Ajay Tandon,Huong Lan Dao,Kari L. Hurt,Hernan L. Fuenzalida-Puelma,2014-06-26 Over the past two decades Vietnam has made enormous progress towards achieving universal coverage UC for its population Significant challenges remain however in terms of improving equity with continuing low rates of enrollment Ensuring financial protection also remains an elusive goal The Master Plan for Universal Coverage approved in 2012 by the Prime Minister directly addresses both these deficiencies in coverage The objective of this report is to assess the implementation of Vietnam SHI and provide options for moving towards UC This is a joint assessment with development partners World Health Organization United Nations Children s Fund Unicef and Rockefeller Foundation Expanding breadth of coverage particularly for those hard to reach groups such as the near poor and informal sector would require substantially increasing general revenue subsidies and fully subsidizing the premiums for the near poor High enrollment rates would however have little impact on financial protection and equity if OOP costs remain high Achieving UC will require sustained efforts to improve efficiency in the system and gain better value for money from available budgetary resources without these efforts any further progress towards UC would be financially unsustainable There is considerable scope for improving efficiency in Vietnam Fragmentation in the pooling of funds gives rise to unnecessary costs Inefficiencies in resource allocation and purchasing arrangements include i an overly generous benefits package ii provider payment mechanisms and the mix of incentives facing providers which result in an oversupply of services iii high prices overconsumption and inappropriate use of pharmaceuticals and iv the structure and incentives embedded within the delivery system The organization management and governance of SHI are fragmented and often dysfunctional The present institutional setting for SHI needs to be assessed and changed

Anion Receptor Chemistry Jonathan L. Sessler, Philip A. Gale, Won-Seob Cho, 2006 Anion recognition plays a critical role in a range of biological processes and a variety of receptors and carriers can be found throughout the natural world Chemists working in the area of supramolecular chemistry have created a range of anion receptors drawing inspiration from

nature as well as their own inventive processes This book traces the origins of anion recognition chemistry as a unique sub field in supramolecular chemistry while illustrating the basic approaches currently being used to effect receptor design The combination of biological overview and summary of current synthetic approaches provides a coverage that is both comprehensive and comprehensible First the authors detail the key design motifs that have been used to generate synthetic receptors and which are likely to provide the basis for further developments They also highlight briefly some of the features that are present in naturally occurring anion recognition and transport systems and summarise the applications of anion recognition chemistry Providing as it does a detailed review for practitioners in the field and a concise introduction to the topic for newcomers Anion Receptor Chemistry reflects the current state of the art Fully referenced and illustrated in colour it is a welcome addition to the literature
