TASER® Conducted Electrical Weapons: Physiology, Pathology, and Law Mark W. Kroll, Jeffrey D. Ho, 2009-02-27 TASER Conducted Electrical Weapons are rapidly replacing the club for law enforcement control of violent subjects within many countries around the globe A TASER CEW is a hand held device that delivers a 400 volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires If necessary it begins with an arcing voltage of 50,000 V to penetrate thick clothing the 50,000 V is never delivered to the body itself Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation this book will have significant utility This volume is written for cardiologists emergency physicians pathologists law enforcement management corrections personnel and attorneys

Country Reports on Human Rights Practices ,2007 Report of the Attorney General ... Michigan. Attorney General's Department, 1975 *Taser Electronic Control Devices and Sudden In-custody Death* Howard E. Williams, 2008 Negative sentiment regarding conducted energy weapons is due largely to a lack of understanding about the technology behind such weapons and a misunderstanding of those weapons' physiological effects Media accounts that speculatively associate sudden in custody deaths with the use of conducted energy weapons only add to the confusion TASER ELECTRONIC CONTROL DEVICES AND SUDDEN IN CUSTODY DEATH documents 310 deaths in the United States proximate to the application of TASER electronic control devices from 1983 through 2006 The study examines the phenomenon of sudden death as it relates to electromuscular disruption technology and TASER electronic control devices by constructing 213 case studies dating from 1983 through 2005 and analyzing information available from news accounts police reports and autopsies After reviewing the available evidence from this extensive case study the author concludes that these conducted energy weapons are excluded as the cause of death in 182 of the 212 cases In only two cases did the evidence tend to confirm the weapon was either a cause of death or a significant contributing factor While arguing that the TASER electronic control devices are safe less lethal weapons the author also cautions that they are not completely effective He notes that the weapons were not effective in subduing more than 60 percent of violent or aggressive subjects in the 213 case studies and he documents 131 cases of fatal police shootings and one police fatality following the failure of the weapons

The only way to determine whether the TASER electronic control devices is responsible for deaths is to separate evidence from conjecture and analyze the facts of each case This book will be an excellent resource for law enforcement professionals attorneys investigators and criminal justice personnel Task Force Report Issued Pursuant to Senate Resolution 0051 95th General Assembly Illinois Law Enforcement Training and Standards Board,2007

Country reports on human rights practices Senate Committee on Foreign Relations and House Committee on Foreign Affairs,2013-02-20 The idea of human rights begins with a fundamental commitment to the dignity that is the birthright of every man woman and child Progress in advancing human rights begins with the facts And for the last 34 years the United States has produced the Country Reports on Human Rights Practices providing the most comprehensive record available of the condition of human rights around the world These reports are an essential tool for activists who courageously struggle to protect rights in communities around the world for journalists and scholars who document rights violations and who report on the work of those who champion the vulnerable and for governments including our own as they work to craft strategies to encourage protection of the human rights of more individuals in more places Joint Committee Print S Prt 112 40 *In the Interests of Safety* Tracey Brown,Michael Hanlon,2014-07-03 Does an airline pilot really need to surrender his tweezers at airport security when he s about to board an aircraft equipped with an axe on the back of the cockpit door Can a mobile phone really cause a major explosion at a gas station And is there really a good reason why you should be prevented from swimming in a lake more than a foot deep These rules exist and they exist in the name of our own protection But in this engrossing dissection of global health safety and security regulations authors Tracey Brown and Michael Hanlon dig a little deeper to discover the real reasons behind many of the instructions we obey without questioning their creators motives Their conclusions range from the startling to the staggering and in presenting them the authors seek to empower readers to question the people and organisations who come up with them in the first place

Police Misconduct Cliff Roberson,2017-02-17 This book explores the different types of police misconduct including the use of excessive force It also explores what types of officers become involved in illegal misconduct steps jurisdictions may take to prevent such problems and discusses who should police the police Also included is a historical analysis of police misconduct discussions on the legal restrictions designed to prevent police misconduct and steps that the jurisdiction may take to limit their liability Ancillary material is available with course adoption

Federal Reports on Police Killings U.S. Department of Justice,2017-06-27 After a series of incidents in which police officers in Chicago Cleveland Baltimore and Ferguson Missouri killed four unarmed African Americans Laquan McDonald Tamir Rice Freddie Gray and Michael Brown resulting in widespread civic unrest and violent protests the Department of Justice launched investigations into each incident including in depth probes into the police departments behind them This is the complete and unexpurgated text of their findings

Defund Sandy Hudson,2025-04-01 A fiercely argued deeply informed examination of why defunding the police is the only way to support a model of security and protection that increases public safety overall Over the last few years in response to videos demonstrating the brutal and often deadly tactics of law enforcement officers calls to defund the police have increasingly rung out across the world But this is not a trendy new movement Black activists have been sounding the alarm on the dangers of policing for decades Time and again history has watched as officers respond to minor calls with escalation wrongful arrests and even murder Yet policymakers continue to fund and endorse reform programs that have proven ineffective at curbing these actions Why Because most of what we know about policing is wrong In *Defund* longtime activist Sandy Hudson examines the origins of commonly held ideas about police and safety to show how police related social policies are based more on a sensationalized idea of safety than on outcomes and data She demonstrates the destructive effects of policing on scores of people arguing that investment in community resources and infrastructure rather than law enforcement is the key to making us safer Clear eyed and hopeful yet incisive and pragmatic *Defund* paves a clear path forward and demonstrates that a future without police is not only entirely possible but necessary

A Manifesto for Mental Health Peter Kinderman,2019-10-08 A Manifesto for Mental Health presents a radically new and distinctive outlook that critically examines the dominant disease model of mental health care Incorporating the latest findings from both biological neuroscience and research into the social determinants of psychological problems Peter Kinderman offers a contemporary

biopsychosocial alternative He warns that the way we care for people with mental health problems is creating a hidden human rights emergency and he proposes a new vision for the future of health organisations across the globe The book highlights persuasive evidence that our mental health and wellbeing depend largely on the society in which we live on the things happen to us and on how we learn to make sense of and respond to those events Kinderman proposes a rejection of invalid diagnostic labels practical help rather than medication and a recognition that distress is usually an understandable human response to life's challenges Offering a serious critique of establishment thinking *A Manifesto for Mental Health* provides a well crafted demonstration of how with scientific rigour and empathy a revolution in mental health care is not only highly desirable it is also entirely achievable
