Teaching And Learning In The Language Classroom:

Language Learning Beyond the Classroom David Nunan, Jack C. Richards, 2015-01-30 This volume presents case studies of language learning beyond the classroom. The studies draw on a wide range of contexts from North and South America to Europe and the Asia Pacific region. Each provides principled links between theory, research and practice. While out of class learning will not replace the classroom, ultimately all successful learners take control of their own learning. This book shows how teachers can help learners bridge the gap between formal instruction and autonomous language learning. Although English is the primary focus of most chapters, there are studies on a range of other languages including Spanish and Japanese.

The Dynamics of the Language Classroom Ian Tudor, 2001 **Teaching Without Textbooks** Edward John Wade, 1992 Guide for teachers of English as a foreign language giving a range of methods to arouse and maintain student concentration and heighten motivation. Techniques used include the use of physical exercise such as yoga to raise students' energy levels as well as music and games. **Team Teaching and Team Learning in the Language Classroom** Akira Tajino, Tim Stewart, David Dalsky, 2015-12-14 This book reignites discussion on the importance of collaboration and innovation in language education. The pivotal difference highlighted in this volume is the concept of team learning through collaborative relationships such as team teaching. It explores ways in which team learning happens in ELT environments and what emerges from these explorations is a more robust concept of team learning in language education. Coupled with this deeper understanding, the value of participant research is emphasised by defining the notion of team to include all participants in the educational experience. Authors in this volume position practice ahead of theory as they struggle to make sense of the complex phenomena of language teaching and learning. The focus of this book is on the nexus between ELT theory and practice as viewed through the lens of collaboration. The volume aims to add to the current knowledge base in order to bridge the theory-practice gap regarding collaboration for innovation in language classrooms. **Team Teaching and Team Learning in the Language Classroom** Akira Tajino, Tim Stewart, 2016 Introduction situating collaboration, team teaching, team learning and innovation in ELT practice. Beyond team teaching: an introduction to team learning in language education. A sociocultural analysis of effective team teaching in a Japanese language classroom. Collaboration between English language and content teachers breaking the boundaries. Doing international development through team teaching. Beyond the deficit model: co-constructing team teaching to address learner goals and needs. Interdisciplinary collaboration to promote L2 science literacy in Hong Kong. Communication technology and collaboration for innovation. The dynamics of team learning in the creation of a higher education learning community: a narrative inquiry. The pedagogy of curriculum design: teaching and learning as relational endeavours. A 5000 mile virtual collaboration of team teaching and team learning. Peer mentoring for beginning teachers: factors contributing to professional identity development. **Adult Learning in the Language Classroom** Stacey Margarita Johnson, 2015 This book explores connections between the fields of foreign second language teaching and

adult learning through a case study of adult language learners at the college level The book examines topics such as the value of adult language study its effect on adult learners as well as classroom practices that contribute to deeper learning

Understanding Language Classroom Contexts Martin Wedell, Angi Malderez, 2013-04-11 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed Adult Learning in the Language Classroom

Stacey Margarita Johnson, 2015 This book explores connections between the fields of foreign second language teaching and adult learning through a case study of adult language learners at the college level The book examines topics such as the value of adult language study its effect on adult learners as well as classroom practices that contribute to deeper learning

Understanding the Language Classroom S. Gieve, I. Miller, 2005-11-30 The starting point for this collection is a chapter by Dick Allwright on the language learning and teaching classroom experience entitled Six Promising Directions in Applied Linguistics The other distinguished contributors respond to this discussion with their own interpretations and from their own experience The collection problematizes prescription efficiency and technical solutions as orientations to classroom language learning Complexity and idiosyncrasy on the other hand are recognized as central concepts in a move towards centralizing teachers and learners own understanding of classroom life in the contexts of language learning adult literacy education and language teacher education **Project-Based Learning Applied to the Language Classroom** Juliana Franco Tavares/

Louise Emma Potter, 2018-03-05 In Project Based Learning Applied to the Language Classroom the authors propose a way to develop PBL in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language It is about teaching English as a second or foreign language using Project Based Learning PBL We approach this combination because many people seem to think about implementing PBL in their language classes and ask questions about how to do it but feel that there aren't enough materials based on this methodology In fact most researchers and writers we have come across discuss the applications of PBL in the students mother tongue to subjects such as Math History Literature Social Studies and Science However there are few published works about the specifics of PBL in foreign language classes

Besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly on the fact that communication may be hindered when students do not have enough knowledge in the target language

Research in the Language Classroom Christopher Brumfit, Rosamond Mitchell, 1990 Intended for teachers this text provides a survey of how research can be utilized and how classroom practices can be examined Topics covered include the roles of systematic and unsystematic observation research into learner and teacher behaviour teaching theory and writing up research

Student Engagement in the Language Classroom Phil Hiver, Ali H. Al-Hoorie, Sarah Mercer, 2020-12-02 Through a mix of conceptual and empirical chapters this book defines engagement for the field of language learning It serves as an authoritative guide for anyone wishing to understand the unique insights engagement can give into language learning and teaching or anyone conducting their own research on engagement within and beyond the classroom

Foreign Language Education in Multilingual Classrooms Andreas Bonnet, Peter Siemund, 2018-10-15 This volume challenges traditional approaches to foreign language education and proposes to redefine them in our age of international migration and globalization Foreign language classrooms are no longer populated by monolingual students but increasingly by multilingual students with highly diverse language backgrounds This necessitates a new understanding of foreign language learning and teaching The volume brings together an international group of researchers of high caliber who specialize in third language acquisition teaching English as an additional language and multilingual education In addition to topical overview articles on the multilingual policies pursued in Europe Africa North America and Asia as well as several contributions dealing with theoretical issues regarding multilingualism and plurilingualism the volume also offers cutting edge case studies from multilingual acquisition research and foreign language classroom practice Throughout the volume multilingualism is interpreted as a valuable resource that can facilitate language education provided it is harnessed in appropriate conditions

Learning Strategies in Foreign and Second Language Classrooms Ernesto Macaro, 2002-01-01 An extremely lucid book that mixes discursive prose with exercises questions and prompts for reflection Each theoretical point is supported by a fully explained example The book focuses on the different strategies that people use to learn languages and shows teacher how to a train pupils in those strategies and b adapt their teaching to derive the greatest benefit from each strategy

Bridging Teaching, Learning and Assessment in the English Language Classroom Tijen Akşit, Hande Işıl Mengü, Robin Turner, 2018-11-12 Learning English as a foreign language in any formal education context requires opportunities for learners and teachers to give and receive feedback on the teaching learning process as it is happening These opportunities could be created via various in class activities specifically designed for this purpose Teachers who create and use these diagnostic opportunities effectively detect what learners need in a timely fashion and provide remedial teaching in the right time and mode so that chances can be created for learners to improve their learning There is no one universally accepted way of how to do this however with various approaches for collecting analyzing and reviewing data for this purpose This book

encapsulates the unbreakable relationship between teaching learning and assessment through a range of articles which scrutinize assessment from a wide spectrum ranging from the role of assessment in language learning to ELT teacher assessment literacy from the use of technology in classroom based assessment to practicing teachers reflections on their teacher classroom action research and from the role of the Common European Framework of Reference for Languages CEFR to empirical data analysis

Pedagogical Realities of Implementing Task-Based Language Teaching Rosemary Erlam, Constanza Tolosa, 2022-02-09 This book documents how teachers working in school foreign language learning contexts and teaching beginner learners of languages other than English learn about and use tasks It first presents a pedagogically researched account of how teachers learn about design and evaluate tasks after being introduced to TBLT during an in service programme The authors then go into classrooms to explore ways in which teachers continue to use tasks as part of their regular ongoing classroom language programmes following their in service education The book documents how the teachers use tasks to open up opportunities for language learning for students and investigates how teachers understand and position tasks and TBLT as relevant and of value to their teaching contexts The challenges that teachers face in incorporating TBLT into their practice are also explored The book suggests how the use of the task as a pedagogic tool may contribute to ongoing understanding about TBLT

Process and Experience in the Language Classroom Michael Legutke, Howard Thomas, Christopher N. Candlin, 2014-06-06 Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources Building on a critical review of recent language teaching principles and practice they provide selection criteria for classroom activities based on a typology of communicative tasks drawn from classroom experience The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum

perspectives and its guidance on collaborating with teachers to design interventions to implement strategy instruction. It also identifies key areas for research including the teaching of less studied groups of strategies such as grammar and affective strategies. The book will prove equally valuable to language teachers through the provision of detailed teaching materials and tasks. Those engaged in professional development whether pre or in service teacher education will find a wealth of concrete ideas for sessions, courses and assignments.
