Intelligence Reframed Howard E Gardner, 2000-09-18

Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey His ideas about intelligence and creativity explicated in such bestselling books as *Frames of Mind* and *Multiple Intelligences* over 200 000 copies in print combined have revolutionized our thinking In his groundbreaking 1983 book *Frames of Mind* Howard Gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world Now in *Intelligence Reframed* Gardner provides a much needed report on the theory its evolution and revisions He offers practical guidance on the educational uses of the theory and responds to the critiques

leveled against him He also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value Ultimately argues Gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species Gardner also offers provocative ideas about creativity leadership and moral excellence and speculates about the relationship between multiple intelligences and the world of work in the future *English Language Teaching Materials* Nigel Harwood,2010-03-22 This volume presents a union of theoretical and practical pedagogical perspectives on materials design and development *Catalog of Copyright Entries.
