 acquisition of Spanish that provides a state of the art comprehensive overview of Spanish morphosyntactic development in  
 monolingual and bilingual situations Its content is organized around key grammatical themes that form the empirical base of  
 research in generative grammar nominal and verbal inflectional morphology subject and object pronouns complex structures  
 involving movement topicalizations questions relative clauses and aspects of verb meaning that have consequences for syntax  
 The book argues that Universal Grammar constrains all instances of language acquisition and that there is a fundamental  
 continuity between monolingual bilingual child and adult early grammatical systems While stressing their similarities with  
 respect to linguistic representations and processes the book also considers important differences between these three  
 acquisition situations with respect to the outcome of acquisition It is also shown that many linguistic properties of Spanish  
 are acquired earlier than in English and other languages This book is a must read for those interested in the acquisition of  
 Spanish from different theoretical perspectives as well as those working on the acquisition of other languages in different  
 contexts Athenaeum and Literary Chronicle ,1855
