The Evolution of the Computer

You may not remember a time before computers, the Internet, and email, but their invention is really fairly recent.

Early Computers

Computers were originally created to help solve difficult problems and calculations quickly. Early inventions, however, modern computers have already been used to make calculating easier. In 1930, Vannevar Bush created *The Differential Analyzer*. It is one of the first modern computers. It could solve difficult problems for physics and engineering that usually took a long time to calculate. However, it could only solve one kind of equation.

World War II Code Breakers

ENIAC, an American computer made to calculate how far an object could be projected, was fifty feet long!

The Invention of the Personal Computer

For a long time, computers were used by scientists and businesses only. Even the inexpensive models could cost several hundred thousand dollars. Eventually smaller versions were created for scientists to buy for personal use, but they were still too complicated for the general public. As computers got smaller, hobbyists began to take interest. One company began selling kits to assemble your own computer. Later, a company called Apple, started by two young hobbyists, began to sell directly to the general public. In 1982, a

Bodies of Women Sarah England, 2018-08-15 Writing Terror on the Bodies of Women Media Coverage of Violence against Women in Guatemala analyzes the scope and dynamics of violence against women in Guatemala and how it is represented in the print media Using nearly two thousand Guatemalan newspaper reports covering murders and assaults on women this book contextualizes violence against women within the history of violence in Guatemala gender ideologies and patriarchal social structures and the contemporary demands of the women's movement for social and legislative change It shows that while some newspapers cover violence against women with investigative reports and editorials that use feminist analysis and

language these are overshadowed by the large number of individual reports that reproduce narratives of terror and conceal the gendered nature of violence against women by suggesting that delinquents gangs unknown men and inexplicably violent husbands are the main culprits while simultaneously upholding dichotomous gendered narratives of good and bad wives and daughters

Touch in Sports Coaching and Physical Education Heather Piper, 2014-08-07 In our increasingly risk averse society touch and touching behaviours between professionals and children have become a fraught issue In sports coaching and physical education touching young sports performers and participants has in some contexts come to be redefined as dubious and dangerous Coaches find themselves operating in a framework of regulations and guidelines that create anxiety for them and others and for many volunteer and sometimes professional coaches this fearful context has led them to question the risks and benefits of their continuing involvement in sport *Touch in Sports Coaching and Physical Education* is the first book to explore this difficult topic in detail Drawing on a series of international studies from the US UK Australia Canada Sweden and elsewhere it presents important new research evidence and examines theories of risk and moral panic that frame the discussion By challenging prevailing orthodoxies the book makes a significant contribution to critical discussion around practice pedagogy politics and policy in sport and physical education and also informs current debates around the nature and quality of all in loco parentis relationships
