Dattorro, 2015-09-29 Convex Analysis is an emerging calculus of inequalities while Convex Optimization is its application
Analysis is the domain of the mathematician while Optimization belongs to the engineer In layman's terms the mathematical science of Optimization is a study of how to make good choices when confronted with conflicting requirements and demands
The qualifier Convex means when an optimal solution is found then it is guaranteed to be a best solution there is no better choice
As any convex optimization problem has geometric interpretation this book is about convex geometry with particular attention to distance geometry and nonconvex combinatorial and geometrical problems that can be relaxed or transformed into convexity
A virtual flood of new applications follows by epiphany that many problems presumed nonconvex can be so transformed
This is a BLACK WHITE paperback A hardcover with full color interior as originally conceived is available at lulu.com spotlight dattorro
