Multidisciplinary Approaches to Culminating Student Experiences Michael G. Strawser, Robin Yaure, 2024-05-14 Despite the relatively recent popularity of culminating experiences a multidisciplinary and practical resource that provides information for all types of culminating student experiences is not yet available The idea for this volume arose because of the recognition that a holistic and applied resource for those looking to have general knowledge of different ways to assess student learning especially at the undergraduate level was lacking This text seeks to fill a gap and provide a historical context for culminating experiences suggestions for assessment foundational knowledge for different types of projects and finally approaches to using these experiences in various disciplines Because of the information desired experts in their field from a wide variety of disciplines were approached to be chapter contributors This resource focuses predominantly on undergraduate students but many of the chapters can either be applied to both undergraduate and graduate students e g thesis or specifically focus on the graduate student population e g dissertation *Global Perspectives and Practices for Reform-Based Mathematics Teaching* Kartal, Ozgul, Popovic, Gorjana, Morrissey, Susie, 2022-04-22 Reform based mathematics has become a popular topic in the education field as this teaching emphasizes classroom discourse and instructional goals related to student engagement and an understanding of mathematical reasoning concepts and procedures using instructional practices that build on students informal knowledge of mathematics It also connects mathematics with other disciplines and the real world and provides opportunities for students to contribute and invent their own methods during problem solving Further study on the best practices benefits and challenges of implementing this teaching into education is required *Global Perspectives and Practices for Reform Based Mathematics Teaching* explores international perspectives on diverse reform based practices in teaching and learning mathematics describes challenges and issues for teachers and teacher educators promotes reflection and academic discussion at various levels and in various educational systems and raises questions for the field of mathematics education Covering a range of topics such as teacher preparation programs and integrated learning spaces this reference work is ideal for academicians practitioners researchers instructors educators and students **The Unfinished Quest** Clair T. Berube, 2008-06-01 Modern educators are currently ideologically in one of two camps those who see American education as heading in the right direction and those who fear that it has gone tragically astray For over 100 years the American educational system has been the hope of those who want to level the playing field of opportunity yet today we continue to lag behind several industrialized countries when comparing standardized science test scores Is this acceptable in the most advanced affluent country on earth Why are we not the reigning educational system on the planet And are standardized test scores even the best way to assess the type of learning it takes to lead the world in science achievement The nature of science does not lend itself well to bubble tests yet these assessments are all we have to prove that our students are good scientists This book was born of a science teacher s frustration brought on by the standardized

testing movement's reliance on high stakes tests as the sole measurement tool with which to measure achievement Science by its very nature relies on original thinking for discovery and innovation How can this be measured by a bubble test And how do these high stakes tests affect minorities girls those with disabilities and at risk students September 11 2001 alerted us that we Americans can be less creative than our enemies an unprecedented event in American history What if changing the way we teach and assess science learning better prepares our citizens for creative preventions and solutions to world problems instead of creating citizens who have to react to world problems The nature of science begs a better way

Argue with Me Deanna Kuhn, Laura Hemberger, Valerie Khait, 2017-09-19 It is essential that middle and high school students develop argument skills. This rich resource provides a clear step by step approach that achieves this goal. The method is rooted in peer dialog and makes use of readily available technology. The authors document impressive gains in students skills in producing and interpreting both dialogic and written arguments. The method can be used in English or content area classes or even be implemented as a stand alone class or as part of a debate program. This curriculum helps students become critical thinkers prepared for the demands of college careers and citizenship. Book Features Background on why students should develop argument skills and what these skills consist of. The nuts and bolts of how to implement the curriculum in your own classroom. Alignments to the Common Core State Standards and Next Generation Science Standards. Accessible video material showing both teacher's instructions and students activities. Samples of students written work. Assessment tools that you can use or modify to fit your own needs. An appendix with additional guides, examples, suggested topics and classroom ready reproducibles. New to the second edition is a chapter on how you can incorporate this approach into an existing curriculum if you are unable to implement the full program. The techniques are designed to be flexible and adaptable and work with students of all ability levels especially with those who are less motivated and engaged in school. This enhanced edition is also accompanied by free bonus eResources such as suggested readings on different topics and full lesson plans which you can download and print from our website www.routledge.com

9781138911406 **Teaching Science and Investigating Environmental Issues with Geospatial Technology** James MaKinster, Nancy Trautmann, Michael Barnett, 2013-11-05 The emerging field of using geospatial technology to teach science and environmental education presents an excellent opportunity to discover the ways in which educators use research grounded pedagogical commitments in combination with their practical experiences to design and implement effective teacher professional development projects. Often missing from the literature are in depth explicit discussions of why and how educators choose to provide certain experiences and resources for the teachers with whom they work and the resulting outcomes. The first half of this book will enable science and environmental educators to share the nature and structure of large scale professional development projects while discussing the theoretical commitments that undergird their work. Many chapters will include temporal aspects that present the ways in which projects change over time in response to evaluative research and practical experience. In the second half of the book faculty and others whose focus is on national and international scales will share the ways in which they are working to meet the growing needs of teachers across the globe to

incorporate geospatial technology into their science teaching These efforts reflect the ongoing conversations in science education geography and the geospatial industry in ways that embody the opportunities and challenges inherent to this field This edited book will serve to define the field of teacher professional development for teaching science using geospatial technology As such it will identify short term and long term objectives for science environmental and geography educators involved in these efforts As a result this book will provide a framework for future projects and research in this exciting and growing field

Forms of Practitioner Reflexivity Hilary Brown, Richard D. Sawyer, Joe Norris, 2016-09-07 This edited volume addresses the different methods professionals use to promote a critical reflective and reflexive stance among practitioners leading to both a reconceptualization of practice and its subsequent change The goal of increased reflection in professional education is intended to expand approaches for professionals to work with diverse others It is also intended to increase their levels of cognitive differentiation and depth of professional consciousness about themselves alongside diverse others in a rapidly changing world This is an important issue in a range of applied professional programs from education to medicine social work to psychology business to criminal justice in nearly every country in the world
