Energy Abstracts for Policy Analysis ,1984 **Colstrip Project** ,1981 **Optimal Redistributive Taxation** Matti Tuomala, 2016-01-21 Tax systems raise large amounts of revenue for funding public sector s activities and tax transfer policy together with public provision of education health care and social services play a crucial role in treating the symptoms and the causes of poverty The normative analysis is crucial for tax transfer design because it makes it possible to assess separately how changes in the redistributive criterion of the government and changes in the size of the behavioural responses to taxes and transfers affect the optimal tax transfer system Optimal tax theory provides a way of thinking rigorously about these trade offs Written primarily for graduate students and researchers this volume is intended as a textbook and research monograph connecting optimal tax theory to tax policy It comments on some policy recommendations of the Mirrlees Review and builds on the authors work on public economics optimal tax theory behavioural public economics and income inequality The book explains in depth the Mirrlees model and presents various extensions of it The first set of

extensions considers changing the preferences for consumption and work behavioural economic modifications such as positional externalities prospect theory paternalism myopic behaviour and habit formation but also heterogeneous work preferences besides differences in earnings ability The second set of modifications concerns the objective of the government The book explains the differences in optimal redistributive tax systems when governments instead of maximising social welfare minimise poverty or maximise social welfare based on rank order or charitable conservatism social welfare functions The third set of extensions considers extending the Mirrlees income tax framework to allow for differential commodity taxes capital income taxation public goods provision public provision of private goods and taxation commodities that generate externalities The fourth set of extensions considers incorporating a number of important real word extensions such as tagging of tax schedules to certain groups of tax payers In all extensions the book illustrates the main mechanisms using advanced numerical simulations *West Federal Taxation*, 2006 Can We Price Carbon? Barry G. Rabe, 2018-04-06 A

political science analysis of the feasibility and sustainability of carbon pricing drawing from North American European and Asian case studies Climate change economists generally agree is best addressed by putting a price on the carbon content of fossil fuels by taxing carbon by cap and trade systems or other methods But what about the politics of carbon pricing Do political realities render carbon pricing impracticable In this book Barry Rabe offers the first major political science analysis of the feasibility and sustainability of carbon pricing drawing upon a series of real world attempts to price carbon over the last two decades in North America Europe and Asia Rabe asks whether these policies have proven politically viable and if adopted whether they survive political shifts and managerial challenges over time The entire policy life cycle is examined from adoption through advanced implementation on a range of pricing policies including not only carbon taxes and cap and trade but also such alternative methods as taxing fossil fuel extraction These case studies Rabe argues show that despite the considerable political difficulties carbon pricing can be both feasible and durable **Taxation in the Global Economy**

Assaf Razin, Joel Slemrod, 2008-04-15 The increasing globalization of economic activity is bringing an awareness of the international consequences of tax policy The move toward the common European market in 1992 raises the important question of how inefficiencies in the various tax systems such as self defeating tax competition among member nations will be addressed As barriers to trade and investment tumble cross national differences in tax structures may loom larger and create incentives for relocations of capital and labor and efficient and equitable income tax systems are becoming more difficult to administer and enforce particularly because of the growing importance of multinational enterprises What will be the role of tax policy in this more integrated world economy Assaf Razin and Joel Slemrod gathered experts from two traditionally distinct specialties taxation and international economics to lay the groundwork for understanding these issues which will require the attention of scholars and policymakers for years to come Contributors describe the basic provisions of the U S tax code with respect to international transactions highlighting the changes contained in the U S Tax Reform Act of

1986 explore the ways that tax systems influence the decisions of multinationals examine the effect of taxation on trade patterns and capital flows and discuss the implications of the opening world economy for the design of optimal international tax policy The papers will prove valuable not only to scholars and students but to government economists and international tax lawyers as well

Full Employment in a Free Society (Works of William H. Beveridge) William H. Beveridge,2014-11-27 Beveridge defined full employment as a state where there are slightly more vacant jobs than there are available workers or not more than 3% of the total workforce This book discusses how this goal might be achieved beginning with the thesis that because individual employers are not capable of creating full employment it must be the responsibility of the state Beveridge claimed that the upward pressure on wages due to the increased bargaining strength of labour would be eased by rising productivity and kept in check by a system of wage arbitration The cooperation of workers would be secured by the common interest in the ideal of full employment Alternative measures for achieving full employment included Keynesian style fiscal regulation direct control of manpower and state control of the means of production The impetus behind Beveridge s thinking was social justice and the creation of an ideal new society after the war The book was written in the context of an economy which would

have to transfer from wartime direction to peace time It was then updated in 1960 following a decade where the average unemployment rate in Britain was in fact nearly 1 5%
