in TESOL *Intelligibility, Tones and Young Beginner Learners of Mandarin Chinese* Robert Neal, 2025-03-12 Two decades ago Mandarin Chinese seemed set to become a mainstream school subject in Anglophone settings Yet current learning outcomes are generally disappointing Is Chinese too difficult for learners at this level Should it be left to the posh kids with pushy parents Set within the context of teaching and learning Chinese at an inner city secondary school in the North of England and adopting a case study research design this book aims to develop research informed insights into the nature of the pronunciation challenges facing beginner learners of Chinese While existing research has shown that producing native like tones is difficult for Anglophone learners the question of how important tones are for intelligibility has been largely ignored Do heavily accented tones actually matter Which specific areas of the learners speech signal mislead their listeners How aware are learners of their own pronunciation errors Teachers of Chinese may not be able to solve entrenched geopolitical tensions but we can lay the foundations for a stronger engagement with China through excellent teaching However before authoritative pedagogical interventions can be made far more understanding is required of not only how adolescent beginners learn Chinese in school settings but also what can be realistically expected of them The Concise Companion to Language Assessment Antony John Kunnan, 2024-10-01 The Concise Companion to Language Assessment provides a state of the art overview of the crucial areas of language assessment teaching and learning Edited by one of the foremost scholars in the field The Concise Companion combines newly commissioned articles on innovations in assessment with a selection of chapters from The Companion to Language Assessment the landmark four volume reference work first published in 2013 Presented in eight themes The Concise Companion addresses a broad range of language assessment methods issues and contexts Forty five chapters cover assessment conceptualization development research and policy as well as recent changes in language assessment technology learning oriented assessment teacher based assessment teacher assessment literacy plurilingual assessment assessment for immigration and more Exploring the past present and future possibilities of the dynamic field The Concise Companion to Language Assessment Contains dedicated chapters on listening speaking reading writing vocabulary pronunciation intercultural competence and other language skills Describes fundamental assessment design and scoring guidelines as well as advanced concepts in scenario based assessment and automated performance scoring Provides insights on different assessment environments such as classrooms universities employment immigration and healthcare Covers various qualitative and quantitative research methods including introspective methods classical reliability and structural equation modeling Discusses the impacts of colonialism and discrimination on the history of language assessment Explores the use of AI in writing evaluation plagiarism and cheating detection and other assessment contexts Sure to become a standard text for the next generation of applied linguistics students The Concise Companion to Language Assessment is an invaluable textbook for undergraduate and graduate courses in applied linguistics language assessment TESOL second language acquisition and language policy **Foreign Language**

Learning from Audiovisual Input Anastasia Pattemore, Ferran Gesa, 2025-06-09 This edited volume brings together studies that test the effectiveness of original version television for foreign language learning and the possible ways to enhance this learning process. The wide availability of on demand streaming platforms and the popularity of television as a leisure activity grant language learners access to massive amounts of authentic original version television input which warrants further research to maximise language learning opportunities. The edited volume features a set of empirical studies encompassing different target languages Dutch, English and French and participant profiles young learners, adolescents and adults which will be of interest to applied linguists, pre and in service language instructors and second language acquisition researchers working on audiovisual input. Importantly this book includes studies on a variety of linguistic features the majority of which have been traditionally underrepresented in audiovisual input research: vocabulary, formulaic sequences, pronunciation, pragmatics and humour. It thus offers a comprehensive view of how original version television may contribute to foreign language development addressing the dynamic and holistic nature of the language learning process. [How to Teach a Language](#) Marty Pilott, 2013-07-02 Is there an ideal approach to teaching? How can I use my time effectively? What do I do with mixed level groups? Should I test learners? Professional teachers will have answers to these questions but many non professionals are working as volunteers teaching community or indigenous languages or running short EFL programmes. If you are one of these you will find it useful to have this concise summary of what you need to know without too much detail. This book shows you the skills and techniques of language teaching to plan and manage a class so that every learners time is used to their best advantage. *Phonetics in Language Teaching* Di Liu, Tamara Jones, Marnie Reed, 2023-01-19 This Element explores ways in which language teachers especially teachers of English can benefit from knowledge of phonetics. It also offers recommendations for introducing and improving pronunciation teaching in the classroom. While hoping that this Element is useful to instructors of all languages the majority of the examples comes from North American English (NAE) and the English language classroom. At the same time the Element acknowledges that English language teaching is rather different from the teaching of other languages since nowadays most interactions around the world in English do not involve a native speaker and use of English as a lingua franca (ELF) has become widespread. Teachers of English should be aware that their students may not want to mimic all aspects of native speaker pronunciation since some native speaker patterns of speech such as the extensive simplification and omission of sounds may not be helpful in enhancing intelligibility.
