The Inverted Classroom Model Jürgen Handke, Natalie Kiesler, Leonie Wiemeyer, 2013-10-24 When the 1st German Inverted Classroom Conference was staged in 2012 the organizers thought that it may have been the first and last conference of this kind Too few teachers seemed to be familiar with this model in the first place and only a tiny fragment of them would actually apply this model to their own teaching scenarios However in the 2013 conference we were overwhelmed with a large number of teachers who not only wanted to find out about this teaching and learning concept but had already used it Consequently the focus of the 2nd German Inverted Classroom Conference to which this conference volume is dedicated was no longer the installation of the Inverted Classroom Model ICM but fine adjustments in the actual application of it This is reflected in the contributions to this volume Even though all three central aspects of the ICM are addressed 1 content production and delivery 2 testing and 3 the in class phase there has been a shift away from mere content production towards an expansion of the model as well as a move towards fine adjustments of the three components
