Christian Albright, Mark Nathan Broadie, Lawrence L. Lapin, William D. Whisler, 2006. This text takes an active learning approach providing numerous examples and problems so students can practice extensively with a concept before moving on. Four types of problems: skill building, skill extending, modeling, and cases are graded within sections and chapters to help instructors assign homework. Another important feature is the way that the text integrates modeling into all functional areas of business: finance, marketing, operations, management, using real examples and real data. The text emphasizes modeling over algebraic formulations and memorization of particular models. Shell files are also provided so that instructors can give students as much or as little information as they need.

Data Analysis and Decision Making S. Christian Albright, Wayne Winston, Christopher Zappe, 2010-10-12. DATA ANALYSIS AND DECISION MAKING emphasizes data analysis, modeling, and spreadsheet use in statistics and management science. This text became a market leader in its first edition for its clarity of writing and teach-by-example approach and it continues that tradition in this edition.
