Andrew Barrie

Shigeru Ban Cardboard Cathedral:

Shigeru Ban Andrew Barrie, 2014 What role does architecture play in the face of natural disaster What sort of ideas and what sort of materials be used to restart a community How can the new draw from the old One of the world's leading architects Shigeru Ban has confronted those issues in the wake of natural disasters around the globe In 2012 he is working in Christchurch to build his largest structure ever a Cardboard Cathedral to stand in for the cathedral at Christchurch's heart which suffered devastating damage in the 2011 earthquake Ban is the most important international architect to have worked in New Zealand and the building will be of enormous local and international interest Written by architect and leading scholar of Japanese architecture Professor Andrew Barrie and fully illustrated with architectural drawings and newly commissioned photography of the environment the people and the building this book will offer visual and verbal insight into great architecture and its social role This will be a book for anyone interested in contemporary architecture and to all those looking toward what the future might hold for Christchurch

Shigeru Ban Bridgit Anderson, 2015 When the 22nd of February 2011 earthquake struck and the Cathedral in the Square was no longer accessible the Diocese of Christchurch lost its mother church and the people of Canterbury lost a beloved symbol of their province The Cardboard Cathedral project captured the imagination of many nationally and internationally The building slowly rose put together step by step tube by tube day by day the handwork of those who believed in the idea Back cover

Design Research in Architecture Murray Fraser, 2021-07-28 What is the role of design research in the types of insight and knowledge that architects create That is the central question raised by this book It acts as the introductory overview for Ashgate's major new series Design Research in Architecture which has been created in order to establish a firm basis for this emerging field of investigation within architecture While there have been numerous architects scholars since the Renaissance who have relied upon the interplay of drawings models textual analysis intellectual ideas and cultural insights to scrutinise the discipline nonetheless until recently there has been a reluctance within architectural culture to acknowledge and accept the role of design research as part of the discourse However in many countries around the world one of the key changes in architecture and architectural education over the last decade has been the acceptance of design as a legitimate research area in its own right and this new series provides a forum where the best proponents of architectural design research can publish their work This volume provides a broad overview on design research that supports and amplifies the different volumes coming out in the book series It brings together leading architects and academics to discuss the more general issues involved in design research At the end there is an Indicative Bibliography which alludes to a long history of architectural books which can be seen as being in the spirit of design research
