Functional Neuroendocrine Tumors Bojana Popovic,Aviral Singh,Francesca Spada,Karin Zibar Tomsic,2025-09-10

One of authentic features of neuroendocrine tumors NETs is a potential to synthesize and secrete biogenic peptides and hormones Typically arising from tumors originating from the pancreas lungs and intestine these products can cause recognizable clinical hormone syndromes Even rarer among the rare functional NETs are in the minority compared to nonfunctional tumors i e 10 40% in a group of pancreatic NETs but they represent great diagnostic and therapeutic challenges For any case of functional NET hormonal hypersecretion syndrome causes excess morbidity sometimes even more threatening than the cancer itself This makes control of hormonal hypersecretion not only additional but sometimes in fact a primary therapeutic goal On the other hand secretory products can be useful as tumor markers and facilitate monitoring of treatment response Unfortunately many of these tumors become refractory to treatment over time and new modalities are required

The Supporting Roots of Trees and Woody Plants: Form, Function and Physiology A. Stokes,2013-04-17

This publication comprises the proceedings of the first International Conference devoted to the structural roots of trees and woody plants The Supporting Roots Structure and Function 20 24 July 1998 Bordeaux France The meeting was held under the auspices of IUFRO WPS 2 01 13 Root Physiology and Symbiosis and its aim was to bring together scientific researchers foresters and arboriculturalists to discuss current problems in structural root research and disseminate knowledge to an audience from a wide disciplinary background For the first time in an international conference emphasis was placed on presenting recent research in the field of tree anchorage mechanics and root biomechanics The way in which tree stability can be affected by root system symmetry and architecture was addressed as well as how movement during wind sway can influence the development and shape of woody roots The role of different nursery and planting techniques was

discussed in relation to effects on root system form and development Root response to different environmental stresses including water temperature nutrient and mechanical stress was addressed in detail The structure and function of woody roots was also considered at different levels from coarse to fine roots with several papers discussing the interaction between roots and the rhizosphere One of the conference highlights was the presentation of new methods in root research by a series of workshops held at LRBB INRA Pierroton on the northern border of the Gascony forest *Land Use Change and Balances of Greenhouse Gases in Colombian Tropical Savannas* Marco Antonio Rondon,2000 Current Research in Pharmaceutical Technology Sabine Globig,William Hunter Jr.,2011-12-15 This title includes a number of Open Access chapters Pharmaceutical technology deals with the discovery production processing and safe and effective delivery of medications to patients Technologies involved include computer modeling for research bioengineering for research instrumentation processes and methods for increasing production and c **Mycotoxin Protocols** Mary W. Trucksess,Albert E.
