 with a Wipac electrical system Wipac issued two ring bound versions of this manual The first was titled Number 3 Manual

 identified However based on the contents we can estimate that they were published in 1964 and 1969 approximately The
 later manual contains considerably more information plus numerous updates to the data in the earlier manual Unfortunately
 some of the information from the earlier manual was also omitted from the later manual as it was probably considered to be

 the entire data from both manuals into a single publication Please note that wherever the earlier data had been updated we
 have only included the latest update in order to prevent duplication of information This combination manual includes
 alternator and generator testing and servicing instructions spare parts illustrations and part numbers plus Technical Data
