The Applied Economics Of Transport:

The Applied Economics of Transport Mark Taylor, 2014-07-16 This book provides an introduction and overview to nine applied financial studies on the theme of transport. The studies cover a wide range of topics from value based trading of real assets in shipping to the determinants of efficiency and productivity in European railways to the market for used cars. The studies employ a variety of applied techniques across a range of countries analysing a range of different modes of transport. This book was originally published as a special issue of *Applied Economics* Special Theme: The Applied Economics of Transport, 2009

Urban Transportation Economics K. Small, 2013-07-04 This title provides a comprehensive review of the economics of urban transportation

The Economics of Transport Jonathan Cowie, 2009-10-16 This book provides an explanation of key underlying economic principles allowing the reader to come to a better understanding of the critical factors that structure and guide transport markets. This is done through an examination of the interaction between the behaviour of individual users and providers of transport services and transport authorities' actions through the implementation of transport policy. The book also considers on going reforms in the organisation of all aspects of transport provision. These reforms seek to move transport delivery away from a model of high state intervention towards one that is far more market focused in its approach thereby significantly increasing individuals' responsibilities for their own transport actions. The Economics of Transport covers topics such as The demand and supply of transport services Market structures and the underlying economic characteristics of transport markets The economics of transport and the environment Transport subsidises and regulation Transport forecasting and appraisal. With a selection of case studies and exercises this book will be of use to higher level students. It will also be of interest to professionals in the transport planning transport modelling and transport economics fields
