Paul Gootenberg

Unodc World Drug Report 2007:

The ^AWorld Heroin Market Letizia Paoli,Victoria A. Greenfield,Peter Reuter,2009-04-10 This book is the first attempt to describe and analyze the world opiate market It looks at how the Taliban achieved a cutback in heroin production in Afghanistan a longtime goal of national and international drug policy agencies and how that cutback impacted the very robust global market for the drug Based on this and other country studies the authors show that internationally supported interventions on the supply side can open up limited opportunities for curbing consumption

The Ethno-Narcotic Politics of the Shan People Thitiwut Boonyawongwiwat,2017-11-15 This book proposes the alternative explanation on the pattern of ethnic conflict especially the on going civil war in Myanmar Previously most scholars accepted that narcotics play the crucial role in conflict as the resource of revenues However this book dramatically changes what we have ever thought before It investigated in both field and documentary research by examining the role of narcotics in the ideological formation process and ethnic identification process Consequently the so called ethno narcotic politics was found in the way that the role of narcotics was able to be used as the source of political mobilization in various ways Furthermore the borderland is the appropriated area where the process of anti ethno narcotics identification could be emerged and later used as the main identity for the ethnic groups who remain fighting against state s power

National Security Cultures Emil J. Kirchner,James Sperling,2010-07-12 This edited collection examines changes in national security culture in the wake of international events that have threatened regional or global order and analyses the effects of these divergent responses on international security Tracing the links between national security cultures and preferred forms of security governance the work provides a systematic account of perceived security threats and the preferred methods of response with individual chapters on Canada China France Germany Italy Japan Mexico Russia UK and USA Each chapter is written to a common template exploring the role of national security cultures in shaping national responses to the four domains of security governance prevention assurance protection and compellence The volume provides an analytically coherent framework evaluating whether cooperation in security governance is likely to increase among major states and if so the extent to which this will follow either regional or global arrangements By combining a theoretical framework with strong comparative case studies this volume contributes to the ongoing reconceptualization of security and definition of threat and provides a basis for reaching tentative conclusions about the prospects for global and regional security governance in the early 21st century This makes it ideal reading for all students and policymakers with an interest in global security and comparative foreign and security policy

Issues of Governance, Security, and Development in Contemporary Africa Mohamed Saliou Camara,Alem Hailu,Sabella O. Abidde,2023-12-15 Governance security and

development are three critical components of a dialectical nexus that is both dominant and determinant for any objective and fruitful quest for the understanding of the trajectory of a country a region or in the case of Africa a continent from a colonial past to a neocolonial and meta colonial present and toward a future of strategic optimal independence and self reliance That colonial past and the ensuing neocolonial and meta colonial present have made these critical components and the dialectical nexus that they form particularly challenging for the African continent For this reason Issues of Governance Security and Development in Contemporary Africa offers an in depth interdisciplinary analysis of the challenges that contemporary Africa faces within these critical areas as well as the resources and prospects that the continent possesses and can leverage to overcome the said challenges Using case studies involving a range of countries across the continent Mohamed Saliou Camara Alem Hailu and Sabella O Abidde argue that Africa needs to decolonize the terms of reference that guide its nation building statecraft and national development agenda in ways that will facilitate the establishment of viable systems of governance and security and the promotion of genuine development *Encyclopedia of Social Work* ,1965 Public Health Aspects of HIV/AIDS in Low and Middle Income Countries David Celentano,Chris Beyrer,2008-09-11 It has now been 25 years since the apocryphal report in the CDC Morbidity and Mortality Weekly Report dated June 5 1981 entitled Pneumocystis Pneumonia Los Angeles which announced what was to become HIV AIDS HIV has now affected virtually all countries that have looked for it and has had a devastating impact on the public health and medical care infrastructure around the world HIV AIDS has also disproportionately affected nations with the least capacity to confront it especially the developing world nations in Sub Saharan Africa South and Southeast Asia and the emerging republics of Eastern and Central Asia The pandemic unlike any other disease of our time has had profound impacts on the practice of public health itself bringing affected communities into decision making demanding North South partnerships and collaborations and changing the basic conduct of clinical and prevention trials research While much has been written in scholarly publications for medical epidemiologic and disease control specialists there is no comprehensive review of the public health impact and response to HIV AIDS in the developing world This edited volume seeks to systematically describe the emergence and form of the epidemics epidemiology the social community and political response and the various measures to confront and control the epidemic with varying levels of success Of particular importance are strategies that appear to have been useful in ameliorating the epidemic while contrasting the situation in a neighboring country or region where contrasting prevention or care initiatives have had a deleterious outcome Common to all responses has been the international multi sectoral response represented by the Global Fund for HIV AIDS Malaria and Tuberculosis the President s Emergency Plan for AIDS Relief and the Gates Foundation among others to promote HIV pharmacologic therapy in resource poor settings The chapter authors will explore the political challenges in meeting HIV AIDS prevention and care in concert with the public health realities in specific country and regional context Lost Causes Deepak Lal,2012-03-01 Society is cracking Lurching from economic disaster to social decay

our modern day life is plagued by sickness Deepak Lal world renowned economist tackles the hidden roots of our problems in his visionary book *Lost Causes* Providing a completely new framework for socio economic understanding Lal challenges received wisdom with a sure voice and shows how those in power have forgotten to take care of some of the fundamentals of everyday life From a faltering NHS to the war on drugs Lal reveals to the world the lost causes in its current malaise

Why Has West Africa Become a Nexus for the International Traffickers? Yahya H. Affinnih,2023-02-16 This book is undoubtedly rich in different diverse sources and literature that are put together into a coherent whole instead of dispersed copious literature on the genesis of West African countries integration into the world political economy and geopolitics of the drug trade To the author s best knowledge there is no similar book that has focused on the recent West Africa drug connection The book is well researched and documented It fills the missing void in the discourse of West Africa drug trade arrangements This book is one of its kind in the annals of West Africa s drug trade history This thrust and the thesis of the book is to provide a plausible and sufficient explanation as to why West Africa has become international traffickers transshipments and transits hubs and cocaine distribution and repackage centers for cocaine en route to Europe This book is informative for a wide variety of readers such as students social analysts from different social sciences disciplines drug policy makers in West African countries and elsewhere in the world The book s subject matter is a global wide problem that concerns all modern human societies worldwide There are no human societies that are immune to the dynamics of the global drug trade industries that pose threat to human national and global security in its wake

Transnational Crimes in the Americas Marshall B. Lloyd,2018-10-30 Transnational Crimes in the Americas addresses contemporary issues with respect to public institutions that are stakeholders in the fight against globalization of crime Regional public organizations with a primary focus on the Americas constitute a framework for understanding the need for an institutional response within the Western Hemisphere While other authors have addressed the growth of organized crime no one has explained institutional developments in the struggle against transnational crimes Transnational Crimes in the Americas highlights existing organizations emphasizing a regional response to transnational crimes suggestions for a permanent criminal court in the Americas and an appraisal of the current state of institutional developments in the region
