Language Learning and Teaching in a Multilingual World Marie-Françoise Narcy-Combes, Jean-Paul Narcy-Combes, Julie McAllister, Malory Leclère, Grégory Miras, 2019-03-06 The majority of people around the world live in multilingual societies and so it follows that plurilingualism should be considered normal This book proposes a flexible and adaptive framework for designing and implementing language learning environments and tasks which will be useful for practitioners working in classrooms where many languages are already spoken The authors begin by presenting a state of the art review of current research on language learning language teaching and multilingual language acquisition This is followed by a qualitative review of 37 multilingual research projects which are treated as case studies to inform the practical guidance that constitutes the remainder of the book The information and practical framework contained within this book will be of interest to researchers teachers and teacher educators

Delivering Health Lydia Z. Dixon, 2020-11-15 Honorable Mention for the Association for Feminist Anthropology s Rosaldo

Book Prize 2021 Maternal health outcomes are a key focus of global health initiatives In *Delivering Health* author Lydia Z Dixon uncovers the ways such outcomes have been shaped by broader historical political and social factors in Mexico through the perspectives of those who are at the front lines fighting for change midwives Midwives have long been marginalized in Mexico as remnants of the country s precolonial past yet Dixon shows how they are now strategically positioning themselves as agents of modernity and development Midwifery education programs have popped up across Mexico each with their own critique of the health care system and vision for how midwifery can help *Delivering Health* ethnographically examines three such schools with very different educational approaches and professional goals From San Miguel de Allende to Oaxaca to Michoacán and points between Dixon takes us into the classrooms clinics and conferences where questions of what it means to provide good reproductive health care are being taught challenged and implemented Through interviews observational data and even student artwork we are shown how underlying inequality manifests in poor care for many Mexican women The midwives in this book argue that they can improve care while also addressing this inequality Ultimately *Delivering Health* asks us to consider the possibility that marginalized actors like midwives may hold the solution to widespread concerns in health

Border Contraband George T. Díaz, 2015-02-28 Winner Jim Parish Award for Documentation and Publication of Local and Regional History Webb County Heritage Foundation 2015 Present day smuggling across the U S Mexico border is a professional often violent criminal activity However it is only the latest chapter in a history of illicit business dealings that stretches back to 1848 when attempts by Mexico and the United States to tax commerce across the Rio Grande upset local trade and caused popular resentment Rather than acquiesce to what they regarded as arbitrary trade regulations borderlanders continued to cross goods and accepted many forms of smuggling as just In *Border Contraband* George T Díaz provides the first history of the common yet little studied practice of smuggling across the U S Mexico border In Part I he examines the period between 1848 and 1910 when the United States and Mexico s trade concerns focused on tariff collection and on borderlanders attempts to avoid paying tariffs by smuggling Part II begins with the onset of the Mexican Revolution in 1910 when national customs and other security forces on the border shifted their emphasis to the interdiction of prohibited items particularly guns and drugs that threatened the state Díaz s pioneering research explains how greater restrictions have transformed smuggling from a low level mundane activity widely accepted and still routinely practiced into a highly profitable professional criminal enterprise

Dividing Hispaniola

Edward Paulino, 2016-02-16 The island of Hispaniola is split by a border that divides the Dominican Republic and Haiti This border has been historically contested and largely porous Dividing Hispaniola is a study of Dominican dictator Rafael Trujillo's scheme during the mid twentieth century to create and reinforce a buffer zone on this border through the establishment of state institutions and an ideological campaign against what was considered an encroaching black inferior and bellicose Haitian state The success of this program relied on convincing Dominicans that regardless of their actual color whiteness was synonymous with Dominican cultural identity Paulino examines the campaign against Haiti as the construct of a fractured urban intellectual minority bolstered by international politics and U S imperialism This minority included a diverse set of individuals and institutions that employed anti Haitian rhetoric for their own benefit i e sugar manufacturers and border officials Yet in reality these same actors had no interest in establishing an impermeable border Paulino further demonstrates that Dominican attitudes of admiration and solidarity toward Haitians as well as extensive intermixture around the border region were commonplace In sum his study argues against the notion that anti Haitianism was part of a persistent and innate Dominican ethos
