Shift Report For Nurses:

Nursing bedside shift report Heather Gleason, 2014 For healthcare organizations patient safety and satisfaction are major priorities and are impacted by many different professional disciplines Nurses can influence this greatly through the relationships built with patients and the information provided to them regarding care while in the hospital Communication errors are the leading cause of sentinel events for patients reiterating the importance of having a safe transfer of care between nurses at shift change Bedside shift report not only creates transparency of patient information but results in improved patient safety and hospital satisfaction scores Completing nursing shift report at the bedside promotes patients and families contribution to reporting discussion and optimizes patient safety through a nurse's visualization of a patient's condition Watson's Caring Theory and the concept of relationship building provide the framework for implementing bedside shift report A conceptual metaphor integrating caring intentionality and relationships into bedside shift report as well as patient and staff responses provides a visual for the goals of the bedside shift report as well as patient and staff responses provides a visual for the goals of the bedside shift report implementation The use of a standardized reporting tool into bedside shift report will be evaluated through patient and staff surveys Nurses who implement bedside shift report into their practice will produce positive patient outcomes while demonstrating greater commitment to the caring acts that encompass nursing practice *Standardizing the Bedside Shift Report: Improving Communications and Promoting Patient Safety* Chona C. Alforque, 2020 **PROBLEM** Nursing shift reports are integral to nursing as they allow for the transfer of critical information and responsibility of patient care from one nurse to another Ineffective communication during shift to shift reports can contribute to gaps in patient care and breaches in patient safety including medication errors falls and sentinel events The greatest risk of communication breakdown is during transitions in care **CONTEXT** St Louise Regional Hospital a small community hospital consisting of an eight bed medical surgical intensive care unit lacked structure in how handoff should occur and had variances in shift handoffs Observation of the shift handoff at the nurses station revealed many communication gaps that have shown negative impacts on patient safety and outcomes The improvement project described in this paper focused on evidence based practices that support the benefits of bedside shift and implementations of standardized handoff tools **INTERVENTION** Intervention included an education in service for unit managers educational coordinators and staff nurses to emphasize the important benefits of bedside shift report **MEASURES** The three components for evaluating improvement include outcome process and balancing measures to determine whether the improvement project has had the desired impact The outcome measure expected to yield the following direct observation of nurses during bedside report to calculate how often is being done monitor for decrease in overtime due to more efficient shift to shift bedside reports and a review of risk management reports observing for effect on the number and severity of medication errors **RESULTS** The outcome measure is to increase the nurses compliance with bedside shift report in the intensive care unit to at

least 80% within six months of implementation

CONCLUSION With the proposed change bedside shift report will address all the safety hazards by reducing adverse events such as medical errors patient falls at shift change and sentinel events. Bedside shift report improves patient safety, enhances the quality of care, improves patient and nurse satisfaction, decreases unnecessary healthcare expenditure, and saves time.

Nurse Bedside Shift Report, 2013 **Critical Care Nursing Practice Guide: A Road Map for Students and New Graduates** Elizabeth Simon, 2010-09-22

Critical Care Nursing Practice Guide: A Road Map for Students and New Graduates is an essential step-by-step practical guide that helps new nursing graduates, new critical care and nursing students assigned to intensive care units gain the confidence they need to provide optimal care to their patients. This comprehensive text teaches inexperienced nurses how to systematically assess their patients, plan individualized care, implement therapeutic modalities with competence, collaborate effectively, and evaluate the effectiveness of nursing actions. Covering areas such as how to begin, organize, prioritize, analyze, reason, and decide in daily routines and emergencies in the critical care setting, this book enables the novice to become an expert in the ICU. Valuable features such as chapter objectives, summaries, and key terms are included.

Improving Bedside Shift-to-shift Nursing Report Process Nina Herceg, 2015

The aim of the bedside shift-to-shift nursing report project is to increase patient satisfaction, improve patient safety, and strengthen team work by improving the process of communication during shift change on the orthopedic unit. The goal is to put in place a standardized approach to hand over communication between the staff at the change of shift. The project includes staff education sessions consisting of video, role playing, various print materials such as articles, and a guide that includes key components of the bedside report. It will be implemented on a 48-bed orthopedic unit in a West Los Angeles hospital. Microsystem assessment was performed which included SWOT.

analyses Cause Effect analyses and observation of several change of shift reports Data related 5% compliance with bedside shift to shift report and each shift with three to four nurses with over time This project is planned to be implemented in mid January of 2015 My expected results are an increase in patient satisfaction scores due to patients being informed and included in their treatment plan decrease number of falls reduction in nurse overtime and increase in nurse satisfaction Although the project is still in the planning stage there is an increase in the patient satisfaction score related to nursing communication from 65% in August 2015 to 78 2% in October 2015 Comparative data will be collected post implementation to verify the effectiveness of the project

Standardization of Shift Report by Implementing a Nursing Report Sheet and Addressing Patient Values to Meet Patient Needs Roman A Salas,2017 Bedside shift report is a complex process which involves the transition of care from one clinician to another The Agency for Healthcare Research and Quality AHRQ 2013 reported that approximately 70% of patient adverse events are attributed to communication failures between healthcare providers Nurses remain inconsistent with information sharing during bedside shift report leading to communication gaps The object of the clinical nurse leader CNL internship project is to provide true patient centered by standardizing bedside shift report by implementing a nursing report sheet and addressing patient needs The project was conducted in a level one trauma center in San Diego CA on the Medical Oncology Unit The patient population includes a diverse adult population and the average inpatient age is fifty nine years old Although limited the project found to improve patient satisfaction scores However overtime did not decline Rather overtime increased as a result of the health system implementing a new electronic health record

Pathophysiology and Care Protocols for Nursing Management, An Issue of Nursing Clinics Lynn C. Parsons, 2016-01-07 Nursing is an evolving profession that requires continued knowledge updates in formulating a foundation for practice In order to promote patient

safety and satisfaction it is imperative that nurses monitor publications and increase their knowledge base Each patient is different each care management situation requires an individualized plan of care These require the nurse to develop a personal framework for practice that continually develops from this information This mandates an evolving knowledge base which this edition will supply for nurses who work to deliver care that is research based and protocol driven This issue of Nursing Clinics will be both timely and relevant as it will combine two clearly important topics for nurses in care management pathophysiological updates as well as research based protocols that are important to continuity of validated evidence based care delivery This will give nurses across organizations the opportunity to see care from a perspective of patient wholeness and not truncate care in order to address total components With care reimbursement dependent on outcomes it is important for the nurse to see care as a continuum and not finite This issue will give nurses this perspective
