Francis Darwin, 2023-10-01 One little event during this year has fixed itself very firmly in my mind and I hope that it has done so from my conscience having been afterwards sorely troubled by it it is curious as showing that apparently I was interested at this early age in the variability of plants With respect to science I continued collecting minerals with much zeal I must have observed insects with some little care I almost made up my mind to begin collecting all the insects which I could find dead for on consulting my sister I concluded that it was not right to kill insects for the sake of making a collection Life there was perfectly free the country was very pleasant for walking or riding and in the evening there was much very agreeable conversation not so personal as it generally is in large family parties together with music Nothing has left a more vivid picture on my mind than these evenings at Maer from this book Autobiography of Charles Robert Darwin 12 February 1809 19 April 1882 was an English naturalist and geologist best known for his contributions to evolutionary theory He established that all species of life have descended over time from common ancestors This has been edited by his son Francis Darwin Selected Stories of Honor de Balzac by Honor de Balzac In this collection Honor de Balzac presents a selection of his acclaimed short stories showcasing his incredible talent for vivid storytelling and character

The Autobiography of Charles Darwin Charles Darwin,2015-10-01 I may of course be egregiously wrong but I cannot persuade myself that a theory which explains several large classes of facts can be wholly wrong Charles Darwin November 13 1859 Originally published in 1892 this autobiography of the great naturalist and father of modern biology compiled and edited by his son Francis is a an intriguing behind the scenes look into the personal life of a great scientist and the development of one of the most powerful ideas of the modern era Although a short book it is filled with absorbing and interesting glimpses into the mind and personal experiences of the man whose discoveries have had such a profound influence on science philosophy and the modern scientific perspective In the first half of the book Darwin reminisces about his early life his family and upbringing and his five year voyage on the HMS Beagle during which he made the many observations that were later to prove so critical to his formulation of evolutionary theory The second half is devoted mainly to the Origin of Species its foundations development the writing and publication process its varied critical reception and the gradual acceptance and growth of evolutionary theory Also included are thoughts on his lesser known work in geology and the fertilization of flowers plus a selection of his letters Contents CAMBRIDGE 1828 1831 VOYAGE OF THE BEAGLE FROM DECEMBER 27 1831 TO OCTOBER 2 1836 FROM MY RETURN TO ENGLAND OCTOBER 2 1836 TO MY MARRIAGE JANUARY 29 FROM MY MARRIAGE JANUARY 29 1839 AND RESIDENCE IN UPPER GOWER STREET RESIDENCE AT DOWN FROM SEPTEMBER 14 1842 TO THE PRESENT TIME 1876 MY SEVERAL PUBLICATIONS WRITTEN MAY 1ST 1881
