Artificial Intelligence and Precision Oncology Zodwa Dlamini, 2023-01-21 This book highlights the use of artificial intelligence AI big data and precision oncology for medical decision making in cancer screening diagnosis prognosis and treatment Precision oncology has long been thought of as ideal for the management and treatment of cancer This strategy promises to revolutionize the treatment control and prevention of cancer by tailoring tests treatments and predictions to specific individuals or population groups In order to accomplish these goals vast amounts of patient or population group specific data needs to be integrated and analysed to be able to identify key patterns or features which can be used to define or characterize the disease or the response to the disease in these individuals These patterns or features can be as varied as molecular patterns or features in medical images This level of data analysis and integration can only be achieved through the use of AI The book is divided into three parts starting with a section on the use of artificial intelligence for screening diagnosis and monitoring in precision oncology The second part Artificial intelligence and Omics in precision oncology highlights the use of AI and epigenetics metabolomics microbiomics in precision oncology The third part covers artificial intelligence in cancer therapy and its clinical applications It also highlights the use of AI tools for risk prediction early detection diagnosis and accurate prognosis This book written by experts in the field from academia and industry will appeal to cancer researchers clinical oncologists pathologists medical students academic teaching staff and medical residents interested in cancer research as well as those specialising as clinical oncologists

Overcoming Breast Cancer Therapy Resistance Zodwa Dlamini, 2024-06-03 This book addresses the pressing problem of drug resistance in the treatment of breast cancer It provides a comprehensive understanding of the complex mechanisms underlying drug resistance and presents the latest advances in therapeutic approaches to overcome this enormous challenge The book begins with an introduction to the biology of breast cancer treatment modalities and the mechanisms of drug resistance This includes the principles of drug resistance in targeted immune endocrine and chemotherapy In the following sections the authors present innovative strategies to overcome drug resistance and new research directions among others the role of the microbiome in drug resistance molecular profiling of patients for personalized medical care and new drug delivery systems Finally the book concludes with a discussion of the differences in the prevalence and treatment success of breast cancer between high and low income countries This book is an informative resource for students researchers and clinicians in the field of breast cancer research and oncology in general

Sustainability of Southern African Ecosystems under Global Change Graham P. von Maltitz, Guy F. Midgley, Jennifer Veitch, Christian Brümmer, Reimund P. Rötter, Finn A. Viehberg, Maik Veste, 2024-01-05 This open access book about the sustainability of marine and terrestrial ecosystems in southern Africa provides a synthesis of the research program Science Partnerships for the Adaptation to Complex Earth System Processes SPACES II 2018 2022 It addresses the scientific social and economic issues related to climate change its potential impacts on the various ecosystems

adaptations and management interventions for enhancing systems resilience in Southern Africa It is written by numerous scientists from African states and Germany and summarizes the latest research findings which are of great relevance for a better understanding of climate change impacts adaptations and vulnerabilities as well as for developing management options and policy options to reduce the associated risks This is crucial considering that the projected African population increase is exceptional Furthermore climate change is assumed to hit southern Africa extremely hard with a significant increase in extreme events and the frequency of severe droughts heat waves and flooding Southern Africa hosts a high variety of ecosystems which belongs to important biodiversity hotspots for unique flora and fauna The surrounding oceans form in turn a bottle neck within the ocean s global thermohaline circulation act as a still poorly understood carbon sink and source and play an important role for fisheries as they are highly productive Considering these important aspects the book is an important interdisciplinary contribution to the scientific literature and will find a wide readership The book is aimed at students teachers and scientists in the fields of terrestrial and marine ecology environmental nature and landscape planning agriculture environmental and resource management biodiversity and nature conservation as well as scientists and representatives in specialised authorities and associations nature conservationists and policy makers of related disciplines

Nanoelectrocatalysts for Energy and Water Treatment Kumar Raju,Katlego Makgopa,Kwena D. Modibane,Eric Lichtfouse,2024-05-20 Nanomaterials have recently garnered significant attention and practical importance for heterogeneous electrocatalysis This book presents recent developments in the design synthesis and characterisation of nanostructured electrocatalytic materials with a focus on applications to energy and wastewater treatment Electrocatalytic nanomaterials can enhance process efficiency and sustainability thus providing innovative solutions for a wide array of areas such as sustainable energy production conversion and wastewater treatment Readers will gain insights into the latest breakthroughs in electrocatalysis and the activity of nanomaterials in energy conversion applications e g fuel cells hydrogen production water splitting and electro photocatalytic water splitting as well as for wastewater treatment The book explores the development of advanced electrocatalysts particularly hybrid materials **Plant Parasitic Nematode-Host Interactions: Mechanisms and Exploitative Management Strategies** Andressa Machado ,Mario Massayuki Inomoto,Victor Hugo Moura De Souza,James Price,2025-01-23 Plant parasitic nematodes PPN are pathogens common in global agricultural systems There is at least one species of PPN for all major food crops and yield losses caused by nematodes threaten global food security Management of PPN is challenging and varies greatly between different countries crops and

nematodes However a recurring theme for management is improving understanding of the nematode host interaction Exploiting this information could help create better PPN control methods lessening losses associated with PPN by providing more economical and sustainable solutions Interpreting mechanisms fundamental to host parasite interactions is a rapidly evolving area This research offers novel insights about PPN biology and potential routes for exploiting this data for the development of improved PPN control Nematode effector proteins are core components of parasitism and disease development Resistant plants can suppress PPN through a variety of different mechanisms upon recognition of effectors Understanding targets of these proteins and modifying them using gene editing techniques could assist host resistance
