Cases on Informal Learning for Science and Mathematics Education

Sun, Li, Lin, Cheng-Yao, 2025-04-17 Many educators face the challenge of engaging students in science and mathematics often struggling to bridge the gap between theoretical concepts taught in classrooms and their real world applications This disconnect can lead to disinterest and disengagement among students hindering their learning outcomes *Cases on Informal Learning for Science and Mathematics Education* offers a solution to this problem by showcasing how informal learning experiences can significantly enhance students understanding and engagement in these subjects This book demonstrates the potential of informal learning to support and complement formal classroom instruction by presenting a rich collection of case studies It highlights how activities such as cooking budgeting visiting museums and participating in after school math clubs can serve as valuable informal learning experiences that deepen students understanding of science and mathematics concepts The book also addresses the challenge of recognizing the value of informal knowledge in problem solving offering insights and strategies for educators to help students leverage their informal learning experiences *Daily Graphic*
