

NERC System Operator Certification 2015 Exam Resource Materials

Prior to taking a NERC System Operator Certification Examination, please familiarize yourself with the examination content outline for the exam you will be taking and the approved list of references. The content outline for an examination and the list of references are the best sources to use to prepare for the exams. It is the responsibility of each candidate to prepare for an examination on the subject material contained in the content outline for a particular examination.

Examination Content Outlines

The Content Outlines are a comprehensive listing of the job duties performed by the System Operator. The term System Operator is used as an inclusive term meant to encompass all forms of operators whose responsibility is to monitor the bulk electric system from a System Operation Control Center, such as, but not limited to:

- Reliability Coordinator
- Transmission Operator
- Balancing Operator
- Generation Operator

The examination content outlines are the framework used to ensure the content validity of each NERC examination. In other words, each examination form is developed to conform to the content sampling requirements listed for each examination to ensure that the examination is an accurate representation of the knowledge, skills, tasks, and situations encountered by a System Operator. These outlines were developed from a NERC-wide job analysis where system operators indicated the importance and frequency of the various job duties or tasks. The outlines are divided into the following content domains:

- Resource and Demand Balancing
- Emergency Preparedness and Operations
- System Operations
- Interchange, Scheduling, and Coordination
- Transmission Operations
- Protection and Control
- Voltage and Reactive
- Interconnection Reliability Operations and Coordination
