this field didn't know how to interpret it. Based on the results in the study published a paper in Physical Review B in 1986. 2 By the support of Office of Naval Research we created quite a few novel ferroelectric materials. We have done experiments on ferroelectricity, piezoelectricity and pyroelectricity measurements. Based on the experiment we have some intriguing findings. 3 We also work on theories on several topics. First of all we proposed a displacive order disorder (DOD) ferroelectric transition model for para ferroelectric phase transition mechanism. The paper was published in the well known European journal Ferroelectrics. The DOD phase transition mechanism clarified the long time dispute whether the para ferroelectric phase transition was displacive or order disorder one. 4 Derived an Accurate Formulation of Faraday Magnetic Circular Dichroism (MCD) and Kerr Effect of Light in Ferroelectromagnet. 5 published several papers in the frontier of quantum mechanics including the red shift of photon frequency in gravitational potential, the mechanism of electron photo emission, the unification of classical mechanics and quantum mechanics, the origin of quantum particle entanglement and quantum wave packet tunneling. Some papers have caught attentions by physics communities. 5 two patents created by author. One is microwave plasma and plasma torch gasifier. Another one is plasma torch directly refine metal titanium. 6 Also published some papers in Chinese. Some were appeared well known Chinese News Paper. In some paper the advantages and disadvantages in two social systems were analyzed in physical point of view. All these published papers are edited in this collection.

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer,Hanno Hortsch,Oliver Michler,Thomas Köhler,2022-01-28 This book presents recent research on interactive collaborative learning We are currently witnessing a significant transformation in the development of education and especially post secondary education To face these challenges higher education has to find innovative ways to quickly respond to these new needs On the one hand there is a pressure by the new situation in regard to the COVID pandemic On the other

hand the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months Scientifically based statements as well as excellent experiences best practice are absolutely necessary These were the aims connected with the 24th International Conference on Interactive Collaborative Learning ICL2021 which was held online by Technische Universität Dresden Germany on 22-24 September 2021 Since its beginning in 1998 this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education Nowadays the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy In this way we try to bridge the gap between pure scientific research and the everyday work of educators This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education Interested readership includes policymakers academics educators researchers in pedagogy and learning theory schoolteachers learning industry further and continuing education lecturers etc

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i.e. extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
