Knapp, 2021-12-15 In looking for an approach to teaching literature in high school teachers largely fall back on the methods that they had experienced as students These practices often involve a teacher assigning a complex work of literature and then assessing students reading through in class recitations or quizzes Teachers typically dominate the discourse and sometimes take charge of the task by

reading aloud whole swathes of texts to their students We know from our own experience as teachers supervisors of teachers and student teachers and researchers in the field that students are often bored with these approaches and teachers are frequently frustrated with learners unenthusiastic responses to the teachers favorite works of literature There has to be a better way This book offers approaches to engage students in productive procedures for reading complex texts and provides sample activities to allow learners to practice those procedures *The Saturday Review of Politics, Literature, Science, Art, and Finance* ,1868 The Cumulative Book Index ,1913 A Dictionary of Science, Literature, and Art W.
