By Rachel Carson

'One swallow does not make a summer,' so imagine spring without birdsong? *Silent Spring* was written in response to this very real reality.

Silent Spring is quite simply a book that changed the world, and its central question centers on whether humans should control nature. Much loved naturalist David Attenborough, claims that it's the book that had the most significant impact on natural science, after Charles Darwin's *On the Origin of Species*.

Rachel Carson was a stoic, brave, and private woman, who cared deeply about the environment and the influences that humans have on it. She dedicated her life to warning people about the lasting impact of pesticides. Although the book became a manifesto for the environmental movement, this was not Carson's intention. Nonetheless, *Silent Spring* was embraced by many activists, and it shaped many policies and views. In short, it started a revolution.

Carson came from humble beginnings, and was a graduate student at Johns Hopkins University. She studied biology and took up part-time work, but had to leave her doctoral studies prematurely. To make ends meet, she got a job at the United States Bureau of Fisheries as a writer. Her ability to tell passionate and informative stories, led her to write three books on the ocean, which combined science and narrative reflection.

Some letters change the course of history. In 1958 Rachel Carson received one such letter, describing birds dropping dead. 'Over

2052 Jorgen Randers,2012-06-13 With clarity conscience and courage global systems pioneer Jorgen Randers and his distinguished contributors map the forces that will shape the next four decades Forty years ago The Limits to Growth study addressed the grand question of how humans would adapt to the physical limitations of planet Earth It predicted that during the first half of the 21st century the ongoing growth in the human ecological footprint would stop either through catastrophic overshoot and collapse or through well managed peak and decline So where are we now And what does our future look like

In the book 2052 Jorgen Randers one of the coauthors of Limits to Growth issues a progress report and makes a forecast for the next forty years To do this he asked dozens of experts to weigh in with their best predictions on how our economies energy supplies natural resources climate food fisheries militaries political divisions cities psyches and more will take shape in the coming decades He then synthesized those scenarios into a global forecast of life as we will most likely know it in the years ahead The good news we will see impressive advances in resource efficiency and an increasing focus on human well being rather than on per capita income growth But this change might not come as we expect Future growth in population and GDP for instance will be constrained in surprising ways by rapid fertility decline as result of increased urbanization productivity decline as a result of social unrest and continuing poverty among the poorest 2 billion world citizens Runaway global warming too is likely So how do we prepare for the years ahead With heart fact and wisdom Randers guides us along a realistic path into the future and discusses what readers can do to ensure a better life for themselves and their children during the increasing turmoil of the next forty years
