Clark,2022-03-10 For the 250th anniversary of the founding of Dartmouth College the Political Economy Project at Dartmouth assembled a stellar cast of junior and senior scholars to explore the systemic conditions facing those seeking to found a new college two hundred fifty years ago What were the key political economic and religious parameters operating in the Atlantic world at the time of the College s founding What was the religious scene like at the moment when the Rev Samson Occom of the Mohegan nation and the Rev Eleazar Wheelock of Connecticut two men from very different backgrounds whose improbable meeting occurred during the Great Awakening of the early 1740s set about establishing a new school in the northern woods in the 1760s How were the agendas of contemporaries differently mediated by the religious beliefs with which they acted on the one hand and the emerging thought world of political economy very broadly understood on the other These are among the rich and variegated topics addressed in *Dartmouth and the World* which breaks the mold of the traditional commemorative volume *The Universal Class Register of Attendance and Fees, and other particulars required by the New Code, etc* John SHERRATT,1872 *The Philosophy of Mathematics; Translated from the Cours de Philosophie Positive of Auguste Comte, by W. relationship between the aesthetic and the technical Fully engaged technical design is at once aesthetic and structural In the best work the best design the most well made the look and feel of a device its aesthetic perceptual interface is as important a part of the design problem as its mechanism the interface of parts and systems We have no idea how to make something that is merely efficient a rational instrument blindly indifferent to how it appears No engineer can design such a thing and none has ever been built from Artifice and Design In an intriguing book about the aesthetics of technological objects and the relationship between technical and artistic accomplishment Barry Allen develops the philosophical implications of a series of interrelated concepts knowledge artifact design tool art and technology and uses them to explore parallel questions about artistry in technology and technics in art This may be seen at the heart of Artifice and Design in Allen s discussion of seven bridges he focuses at length on two New York bridges the Hell Gate Bridge and the Bayonne Bridge and makes use of original sources for insight into the designers ideas about the aesthetic dimensions of their work Allen starts from the conviction that art and technology must be treated together as two aspects of a common technical human nature The topics covered in Artifice and Design are wide ranging and interdisciplinary drawing from evolutionary biology cognitive psychology and the history and anthropology of art and technology The book concludes that it is a mistake to think of art as something subjective or as an arbitrary social representation and of Technology as an instrumental form of purposive rationality By segregating art and technology Allen writes we divide ourselves against ourselves casting up self made obstacles to the ingenuity of art and technology

Die englische Schriftstellerin Augusta Ada King, Countess of Lovelace, Tochter Lord Byrons, entwickelte bereits in ihrer Jugend ein tiefes Interesse für die Mathematik, insbesondere für Charles Babbages Arbeit an der Analytical Engine. Analytische Maschine. In diesem Notizbuch findet sich eingeführt von Joasia Krysa die vollständige Reproduktion ihrer berühmten Anmerkung G, eine aus einer ganzen Reihe von Anmerkungen mit denen sie ihre Übersetzung eines Textes von Luigi Federico Menabrea über Babbages Recherchen kommentierte. Die Anmerkung G enthält einen Algorithmus, eine Art Software, die Babbages Maschine, die zu diesem Zeitpunkt noch gar nicht existierte, in die Lage versetzen sollte, bestimmte Rechenprozesse durchzuführen und die gemeinhin als erstes Computerprogramm gilt. Während Lovelace in der Anmerkung G Zweifel an der Fähigkeit eines Computers, künstliche Intelligenz zu entwickeln, äußert, sieht sie an anderer Stelle voraus, dass die Tätigkeit der Maschine über das reine Rechnen hinausgehen könnte. In ihrem Denken gelang es ihr, den wissenschaftlichen Rationalismus mit einer subjektiven Vorstellungskraft zu verbinden. Die Anmerkung G wird ergänzt durch ausgewählte Briefe aus Lovelaces Korrespondenz mit Babbage sowie ihr Sonett *The Rainbow*. Ada Lovelace 1815-1852 war eine englische Schriftstellerin.
