Model 4005 Fire Alarm Control Panel

Introduction

For areas requiring eight to thirty-six IDC zones, Simplex 4005 series fire alarm control panels provide flexible initiating circuit monitoring, extensive programmable control capability, and LCD associated circuit-specific custom labels. Surface mount components, efficient microprocessor programming, and easy-to-use control panel operation combine to provide an extensive feature list in a compact, "installation friendly" package.

Panel status and circuit information is efficiently indicated by an alphanumeric LCD readout featuring two lines of 40 characters each. The panel control switches are clearly marked for intuitive operation. Programming of the selectable features is performed by using the display and the panel control switches while in the programming mode.

Applications

The 4005 series fire alarm control panel provides protection for a wide variety of mid-size facilities in the following fields: Educational, Health Care, Business, Storage, Hospitality, Residential, and General Assembly. Its modular design allows IDCs and NACs to be incremented in groups of two or four to satisfy circuit requirements without specifying excess capacity. If the system expands, then additional "snap-in-place" modules can be easily installed on-site.

** WALKTEST performance testing is protected under US Patent No. 4,729,859.

† NACs may be individually configured for city contact relay operation.

NOTE: Contact your local Simplex product supplier for fire alarm control panels suitable for Remote Control applications.
