Teaching and Learning Mathematics Online James P. Howard, II, John F. Beyers, 2020-05-10

Online education has become a major component of higher education worldwide. In mathematics and statistics courses, there exists a number of challenges that are unique to the teaching and learning of mathematics and statistics in an online environment. These challenges are deeply connected to already existing difficulties related to math anxiety, conceptual understanding of mathematical ideas, communicating mathematically, and the appropriate use of technology. *Teaching and Learning Mathematics Online* bridges these issues by presenting meaningful and practical solutions for teaching mathematics and statistics online. It focuses on the problems observed by mathematics instructors currently working in the field who strive to hone their craft and share best practices with our professional community. The book provides a set of standard practices improving the quality of online teaching and the learning of mathematics. Instructors will benefit from learning new techniques and approaches to delivering content. Features: Based on the experiences of working educators in the field. Assimilates the latest technology developments for interactive distance education. Focuses on mathematical education for developing early mathematics courses.

Exam Literacy Jake

Hunton, 2018-08-13. In *Exam Literacy*, A guide to doing what works and not what doesn't to better prepare students for exams. Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. Read, highlight, reread, repeat. If such a revision cycle sounds all too wearisome, familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear so that students will be tested in one off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton

casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results With plenty of practical suggestions and subject specific examples Exam Literacy provides teachers with user friendly advice on how they can make the content they cover stick and shares up to date evidence based information on The nature of learning and the various types of memory How to improve students retention of knowledge and recall of content Why popular revision techniques such as rereading highlighting and summarising may not be as effective as you think How revision strategies that have been identified as being more effective such as interleaving elaborative interrogation self explanation and retrieval practice can be embedded into day to day teaching How students can be encouraged to make use of these winning strategies when revising independently Excel Senior High School

Jamaica and Venezuela R. H. Dave, Unesco Institute for Education, 1986 Enhancing Digital Literacy and Creativity Alicia Blum-Ross, Kristiina Kumpulainen, Jackie Marsh, 2019-11-07

Enhancing Digital Literacy and Creativity is an exploration of how young children gain digital literacies in makerspaces. The international authors investigate how hands-on experimentation with a variety of materials from traditional arts and crafts to contemporary digital tools like 3D printers and laser cutters can aid children in their development of play, creativity, and storytelling. From museums to libraries, nursery schools to community centres, this research shows how making supports the development of creative skills and introduces concepts to be explored in a variety of environments and contexts. Drawing on examples from around the globe described by a range of international academics, *Enhancing Digital Literacy and Creativity* includes chapters on Virtual reality, Museum and library makerspaces, Intergenerational making in families, Making in schools and nursery settings, Assessing learning in makerspaces, Links to previous theories, Social imagination. This book will be a valuable resource for students and researchers in the fields of education and digital literacies, early childhood, teacher educators and practitioners, librarians, museum educators, and makerspace staff.
